Sociological Methodology 1971:

Sociological Methodology 1971 Herbert L. Costner, American Sociological Association, 1971 *Sociological Methodology*, 1973-1974 Herbert L. Costner, 1974 *Sociological Methods & Research*, 1987 Measurement in the Social Sciences Hubert M. Blalock, 2017-09-08 Among the frustrations constantly confronting the social scientist are those associated with the general process of measurement The importance of good measurement has long been recognized in principle but it has often been neglected in practice in many of the social sciences Now that the methodological tools of multivariate analysis simultaneous equation estimation and causal modeling are diffused more widely into the social sciences and now that the very serious implications of random and non random measurement errors are being systematically investigated it is all the more important that social scientists give top priority to the quality of their data and the clarity of their theoretical conceptualizations The book is organized so that one proceeds from problems of data collection to those of data analysis It is not intended to be a complete work covering all types of measurement problems that have arisen in the social sciences Instead it represents a series of studies that are deemed to be crucial for the advancement of social science research but which have not received sufficient attention in most of the social sciences The basic purpose is to stimulate further methodological research on measurement and to study the ways in which knowledge that has been accumulated in some fields may be generalized Part I is concerned with applying scaling approaches developed in psychometrics to problems that arise in other social sciences The focus is on finding better ways to ask questions of respondents so as to raise the level of measurement above that of simple ordinal scales Part II focuses on multiple indicator theory and strategies as applied to relatively complex models and to change data In this section the emphasis shifts to how one analyzes fallible data through the construction of explicit measurement error models Part III deals with the statistical analysis of ordinal data including the interpretation and empirical behaviors of various ordinal measures of association *Measurement in the Social Sciences* Richard A. Zeller, Edward G. Carmines, 1980-04-30 This textbook is designed to bridge the gap between the theorist and the methodologist by presenting an integrated approach to measurement By differentiating between random and systematic error it conveys both statistical techniques and their theoretical underpinnings essential to students of sociology and political science Rather than developing new technical methods of new theoretical structures Professors Zeller and Carmines provide thorough explanations of the assumptions limitations and interpretations of previously established techniques and theories Written at a level accessible to students of social science with some statistical training the book does not presume a sophisticated mathematical background By concentrating on synthesizing the methodological and theoretical realms Zeller and Carmines demonstrate why measurement considerations are important to research and how measurement principles can be most effectively applied *Measurements in the Social Sciences* Hubert M. Blalock, 1974 Among the frustrations constantly confronting the social scientist are those associated with the general process of measurement The importance of

good measurement has long been recognized in principle but it has often been neglected in practice in many of the social sciences. Now that the methodological tools of multivariate analysis, simultaneous equation estimation and causal modeling are diffused more widely into the social sciences and now that the very serious implications of random and non random measurement errors are being systematically investigated it is all the more important that social scientists give top priority to the quality of their data and the clarity of their theoretical conceptualizations as well as to methods for analyzing fallible data. This book deals with selected problems of measurement and is written for graduate students and professional social scientists particularly in the technically less developed fields of sociology, political science and anthropology. The book is organized so that in general one proceeds from problems of data collection to those of data analysis. It is not intended to be a complete work covering all types of measurement problems that have arisen in the social sciences. Instead it represents a series of studies of topics that are deemed to be crucial for the advancement of social science research but which have not received sufficient attention in most of the social sciences. The basic purpose is to stimulate further methodological research on measurement and to study the ways in which knowledge that has been accumulated in some fields may be generalized so that it may be applied to others. The book is divided into three major parts. Part I is concerned with applying scaling approaches developed in psychometrics to problems that arise in other social sciences. The focus is on finding better ways to ask questions of respondents so as to raise the level of measurement above that of simple ordinal scales. Part II focuses on multiple indicator theory and strategies as applied to relatively complex models and to change data. In this section the emphasis shifts to how one analyzes fallible data through the construction of explicit measurement error models. Part III deals with the statistical analysis of ordinal data including the interpretation and empirical behaviors of various ordinal measures of association. The final chapter written by the editor discusses how ordered metric assumptions may be used to make more powerful predictions than those characterizing much of contemporary social science.

H. M. Blalock Jr. 1926-1991 was Professor, Department of Sociology, the University of Washington, Seattle. He was recipient of the 1973 ASA Samuel Stouffer Prize and was a Fellow of the American Statistical Association and the American Academy of Arts and Sciences and is a member of the National Academy of Sciences. He was the 70th president of the American Sociological Association.

Data Resources of the National Institute of Justice National Institute of Justice (U.S.), 1992 Data Resources of the National Institute of Justice, 1995 **Toward a Structural Theory of Action** Peter H. Rossi, 2013-10-22. Toward a Structural Theory of Action. Network Models of Social Structure. Perception and Action centers on the concept of social structure, perceptions and actions as well as the strategies through which these concepts guide empirical research. This book also proposes a model of status role sets as patterns of relationships defining positions in the social topology. This text consists of nine chapters separated into three parts. Chapter 1 introduces the goals and organization of the book. Chapters 2-4 provide analytical synopsis of available network models of social differentiation and then use these models in describing

actual stratification Chapter 5 presents a model in which actor interests are captured Subsequent chapter assesses the empirical adequacy of the two predictions described in this book Then other chapters provide a network model of constraint and its empirical adequacy This book will be valuable to anthropologists economists political scientists and psychologists

Children Of The Great Depression Glen H Elder,2018-10-08 In this highly acclaimed work first published in 1974 Glen H Elder Jr presents the first longitudinal study of a Depression cohort He follows 167 individuals born in 1920 1921 from their elementary school days in Oakland California through the 1960s Using a combined historical social and psychological approach Elder assesses the influence of the economic crisis on the life course of his subjects over two generations The twenty fifth anniversary edition of this classic study includes a new chapter on the war years entitled Beyond Children of the Great Depression Schools and Society: A Sociological Approach to Education Jeanne H. Causal Modeling Herbert B. Asher,1976 Retains complete coverage of the first edition while amplifying key areas such as direct indirect effects standardized unstandardized variables multicollinie arity and nonrecursive modeling *The Problem of Solidarity* Patrick Doreian,Thomas J. Fararo,2012-10-12 Presently the world is undergoing tremendous social cultural and economic transformation For sociologists the challenge is arriving at a sound mapping of this tumultuous world stage In this book the contributing authors consider solidarity as a cognitive problem of basic science They examine how solidarity is produced and reproduced how it is related to social processes and how such processes can be formalized and create conditions for productively studying their properties Mathematical models and representations are presented by the authors as a coherent set of tools for understanding many social phenomena **CCCS Selected Working Papers** Ann Gray,Jan Campbell,Mark Erickson,Stuart Hanson,Helen Wood,2007-11-07 This collection of classic essays focuses on the theoretical frameworks that informed the work of the Centre for Contemporary Cultural Studies at the University of Birmingham the methodologies and working practices that the Centre developed for conducting academic research and examples of the studies carried out under the auspices of the Centre This volume is split into seven thematic sections that are introduced by key academics working in the field of cultural studies and includes a preface by eminent scholar Stuart Hall The thematic sections are Literature and Society Popular Culture and Youth Subculture Media Women s Studies and Feminism Race History Education and Work *Political Tolerance and American Democracy* John L. Sullivan,James Piereson,George E. Marcus,1993-05-15 This path breaking book reconceptualizes our understanding of political tolerance as well as of its foundations Previous studies the authors contend overemphasized the role of education in explaining the presence of tolerance while giving insufficient weight to personality and ideological factors With an innovative methodology for

measuring levels of tolerance more accurately the authors are able to explain why particular groups are targeted and why tolerance is an inherently political concept Far from abating the degree of intolerance in America today is probably as great as it ever was it is the targets of intolerance that have changed
