Property Rights in Blood, Genes and Data Jasper A. Bovenberg, 2005-12-01 Who owns our DNA The intuitive answer to this question is readily apparent you own your own DNA However since Watson and Crick discovered its molecular structure our DNA has gradually evolved from the Secret of Life to a potentially lucrative Commodity This development has triggered conflicting perspectives as to who holds legal title to our blood genes and related health data Rather than focusing on a specific property claim in isolation this book is the first to provide an integrated analysis of the merits of each of these perspectives While the United Nations have proclaimed human DNA as the Heritage of Humanity industry claims it to be patentable subject matter Whereas populations whose DNA is used in national biobanks claim their DNA as their National Property individual patients increasingly stand up for their Personal Property Rights in their samples Meanwhile academic researchers claim their collections of biological materials as their Academic Property Taking a case and context driven approach and backing up traditional legal analysis with historical analogies web surveys and practical experience Jasper Bovenberg provides counter intuitive provocative and practical answers and recommendations for such controversial issues as how to share the benefits of DNA research whether or not to recognize personal property rights in bodily material and access to biomedical datasets in academia This book will interest not only lawyers and researchers but also universities funding agencies industry and policymakers worldwide It is also written to inform patients their relatives doctors and anyone else with an interest in a dilemma that is as universal as our DNA **Sociology** David M. Comprehensible, Arrogantly Local Wiebke Keim, 2017-04-01 From the perspective of the international scholarly community under North Atlantic domination South Africa might look like a peripheral place of knowledge production In recent years a plethora of voices calling for provincializing Europe for deconstructing Eurocentrism and for adopting post and decolonial perspectives have challenged such views They have partly transformed the academic landscape but have had limited success in challenging the fundamental global divides in production circulation and recognition of social scientific knowledge This book chooses a different take on the question of how North Atlantic domination could be challenged by conceptualizing counter hegemonic currents in international sociology Instead of providing theoretical and deconstructive critiques counter hegemonic currents are effective through collective social scientific practice the production of data knowledge and texts of new generations of scholars the interaction with extra university actors leading to the gradual emergence of integrated and productive scientific communities Their orientation towards local arenas of discussion and production of socially relevant research effectively reduces the belief in the hegemony of the North The historical development of South African labour studies is a case in point This study provides a systematic in depth analysis of research and teaching activities networks with extra academic actors and international cooperation over time in the three major Labour Studies centres Johannesburg Durban and Cape Town It draws on a rich variety of material including annual reports of research centres and labour service organizations teaching contents and exam questions the 1974 2003 volumes of the South African Labour Bulletin and newsletters of ISA Research Committee 44 on Labour Movements Qualitative analysis of four seminal books is used to assess their contribution to original general theory building In depth interviews with Labour Studies representatives complement the analysis of documents and literature by reconstructing the oral history of this scholarly community an indispensable source given that many debates could not appear in written form or had to be watered during the Apartheid years The study concludes that over time South African social scientists have generated knowledge on labour industry and trade unions that is universally comprehensible but arrogantly local **Ebook: Sociology: A Brief Introduction** Schaefer, 2014-10-16 Ebook
