Why Men Won't Ask for Directions Richard C. Francis, 2013-12-03 Much of the evolutionary biology that has grabbed headlines in recent years has sprung from the efforts of sociobiologists and evolutionary psychologists to explain sexual features and behavior even differences between how men and women think as evolutionary adaptations They have looked to the forces of natural selection to explain everything from the mimicry of male mockingbirds to female orgasms among humans In this controversial book Richard Francis argues that the utility of this approach is greatly exaggerated He proposes instead a powerful alternative rooted in the latest findings in evolutionary biology as well as research on the workings of our brains genes and hormones Exploring various sexual phenomena Francis exposes fundamental defects in sociobiology and evolutionary psychology which he traces to their misguided emphasis on why questions at the expense of how questions Francis contends that this preoccupation with why questions such as Why won't men ask for directions results in a paranoid mindset and distorted evolutionary explanations His alternative framework entails a broader conception of what constitutes an evolutionary explanation one in which both evolutionary history as embodied in the tree of life and developmental processes are brought to the foreground This alternative framework is also better grounded in basic biology Deeply learned consistently persuasive and always engaging this book is a welcome antidote to simplistic sociobiological exegeses of animal and human behavior

Therapy With Young Men Dave Verhaagen, 2011-01-19 Young adult men in their late teens and early twenties are statistically the least happy of any group of males surveyed What's more scholarly research tells us that adolescent boys and young men have the highest rates of behavioral problems completed suicides and drug and alcohol problems of any demographic group They also tend to have greater problems managing their emotions and successfully negotiating close interpersonal relationships which makes therapy more complex and challenging However when done well therapy with young men can be highly effective and quite rewarding for both the therapist and client In *Therapy With Young Men* Verhaagen presents a comprehensive model of therapy with young men that addresses each of these concerns beginning with the rapport and engagement process and then moving to ways to increase motivation for changing problem behaviors and increasing adaptive skills The book describes a wide range of novel effective cognitive behavioral interventions that can readily be employed in the therapeutic process

Territorial Warfare Tumiasang Mabe , What comes to your mind when you think about warfare Have you ever imagined warfare in the context of territory The word territory means a geographic area that a person or organization is responsible for in the course of work It means someone is in control Do you think God is in control on the earth Territorial warfare is a very complex subject to speak about or engage in Believers do not cover or engage in this type of warfare Are we ignorant or afraid of territorial spirits Do we understand what we should do to engage in this warfare When looking at scripture for insight there is not much other than a few important passages that discuss and affirm the reality associated with this type of warfare Scripture affirms there are territorial spirits Territorial

spirits are described as demonic spirits said to control certain activities in the territory They have the ability to manipulate what happens in the territory the outcomes of people s lives and circumstances at large If we want revival in our world then we should engage in this type of warfare however this warfare requires a lot of spiritual understanding so that we don t fight ignorantly All past stories of the move of God were a result of people who engaged in territorial warfare It is important for us to know that every territory will always bow to the greater priesthood whether good or bad
