Charter Final Application for Boston Jonas Altidor, 2006-10 [Attacking the Standardized Exam](#)

Ronald S. Thompson, 2011-09-16 I have spent the better part of the last 53 years taking well over a thousand multiple choice tests As a teenager I struggled through high school Armed with an average IQ and some fairly significant learning disabilities I barely graduating with a 1.4 grade point average However I was smart enough to figure out early on that much of academics and that achieving success in academics had far more to do with the ability to master multiple choice tests than raw intellect From there I began a 35 year study on the art and science of passing mastering and scoring high on multiple choice tests Despite a very substandard high school GPA I scored high enough on the SAT and the ACT to be accepted to the University of Michigan one of the top academic institutions in the Country Upon graduation from college I accepted a commission as an officer in the United States Marine Corps As a Marine Officer I completed dozens of military and civilian schools including a Masters Degree from Boston University and a Juris Doctor Degree from the University of Detroit School of Law In fact I earned a full ride military scholarship to law school based primarily on the fact I scored so highly on the Law School Aptitude Test 98th percentile Upon completion of law school I passed the Michigan Bar exam on the first attempt scoring 149 points on the multistate the multiple choice portion of the exam which was one question away from automatic passage at 150 they examiners do not need to grade the essay portion I have also taken and applied many of the Marine Corps concepts of discipline and mental toughness to the art of preparing for taking and passing multiple choice tests Resigning my commission and leaving the Marine Corps in 1990 I continued both my education as well as honing my test taking skills I currently hold 12 professional licenses and 5 professional designations which required me to pass several comprehensive and difficult multiple choice examinations I have also attended dozens of professional test preparation courses From those courses I have cherry picked all of the valuable lessons and test taking tips and have included those in this book One of the professional licenses I hold is a paramedic license As a paramedic I have gained a much greater understanding of the anatomy and physiology of test taking Test taking is all about the central nervous system which of course includes the brain However as I explain in this book it is clear that the sympathetic and parasympathetic nervous systems have as much to do with passing and failing multiple choice tests as does the brain Accordingly I have also applied

many of those principals in this book **School and Classroom Organization** Robert E. Slavin, 2013-03-07 Because the organization of the classroom and the school provide the framework for teaching and learning this important volume reviews research that focuses on specific issues including achievement effects of alternative school and classroom organizational practices ability grouping departmentalization special and remedial programs evaluation processes and class size The studies utilize realistic evaluations rather than laboratory or experimental data and do not prescribe particular practices

Illiteracy in America National Advisory Council on Adult Education (U.S.). Literacy Committee, 1986 Motivating Students to Learn Jere E. Brophy, 2010-05-26 Written specifically for teachers this book offers a wealth of research based principles for motivating students to learn Its focus on motivational principles rather than motivation theorists or theories leads naturally into discussion of specific classroom strategies Throughout the book these principles and strategies are tied to the realities of contemporary schools and classrooms The author employs an eclectic approach to motivation that shows how to effectively integrate the use of extrinsic and intrinsic strategies Guidelines are provided for adapting motivational principles to group and individual differences and for doing repair work with students who have become discouraged or disaffected learners *Resources in Education* , 1991-04 50 Ways to Close the Achievement Gap Carolyn J. Downey, 2009 Outlines research based strategies for developing high performing schools and fostering educational equity for all students
