

Elements and Logic of Statistical Hypotheses Testing

- Consider a population or distribution whose mean is μ . To introduce the elements and discuss the logic of hypotheses testing, we consider the problem of deciding whether $\mu = \mu_0$, where μ_0 is a pre-specified value, or $\mu \neq \mu_0$. This is the type of problem that the FDA might be interested.
- The **first step** in hypotheses testing, **which should be done before you gather your sample data**, is to set up your statistical hypotheses, which are the null hypothesis (H_0) and the alternative hypothesis (H_1).
