

Hypothesis Test for Significance of Regression

If the model is significant, then SS_R/SS_E should be "substantially large".

However, we need to normalize by degrees of freedom:

$$\frac{MS_R}{MS_E} = \frac{SS_R/k}{SS_E/[n - (k + 1)]} = \frac{SS_R/k}{SS_E/[n - p]}$$

Testing Research Hypothesis Using Multilinear Regression:

Computational Biomechanics of the Heart and Vasculature with Potential Clinical and Surgical Applications

Dalin Tang, Estefania Peña, Daniela Valdez-Jasso, Zhiyong Li, Youjun Liu, 2022-05-03 *Testing Research Hypotheses Using Multiple Linear Regression* Keith A. McNeil, Francis J. Kelly, Judy T. McNeil, 1975 Multiple regression is becoming more widely used as the statistical technique for answering research hypotheses. This is so for several reasons: 1) the technique is extremely versatile; 2) the computer has made the technique more available to researchers; and 3) texts such as the authors' earlier work are making the technique more available to researchers. The statistical technique of multiple regression allows the inclusion of numerous continuous quantitative and categorical qualitative variables in the prediction of some criterion. Appendixes contain a multiple regression computer program and data on which the problems are based; a discussion of the similarities and differences between analysis of variance and multiple regression; and a computer program providing the regression solution to natural language research hypotheses.
