Please take this book as it is a working docu ment It started as an idea that has grown It will never be correct but should be
self correcting In the limit if there is one the book should approach a correct state It is not the detail and the numbers that
matter but the structures and the order These structures are inherently linked with the many minds that have made Maple
the minds of perhaps the best mathematicians certainly some of the most useful Our environment is not separate from
mathematics mathematics is but one tool of several to help with understanding the environment It is a harsh tool that
requires numbers and symbolism Maple handles the symbolism superbly numbers need more consideration We have included
a substantial amount on reading and writing numbers data and dealing with floating point numbers It is the devil in the detail
that continually comes back to us in working with Mathematics and Maple It becomes raw and defined Many of the things we
do have rational and logical bases but we don t know what they are Often in following the code and talking with an input line
to Maple the detailed way of performing a task becomes clear But not without frustration the task is invariably simple though
