Symptoms of Unknown Origin Clifton K. Meador, 2005-04-22 For years after graduating from medical school Dr Clifton K Meador assumed that symptoms of the body when obviously not imaginary indicate a disease of the body something to be treated with drugs surgery or other traditional means But over several decades as he saw patients with clear symptoms but no discernable disease he concluded that his own assumptions were too narrow and indeed that the underlying basis for much of clinical medicine was severely limited Recounting a series of fascinating case studies Meador shows in this book how he came to reject a strict adherence to the prevailing biomolecular model of disease and its separation of mind and body He studied other theories and approaches George Engel's biopsychosocial model of disease Michael Balint's study of physicians as pharmacological agents and adjusted his practice accordingly to treat what he called nondisease He had to retool learn new and more in depth interviewing and listening techniques and undergo what Balint termed a slight but significant change in personality In chapters like The

Woman Who Believed She Was a Man and The Diarrhea of Agnes Meador reveals both the considerable harm that can result from wrong diagnoses of nonexistent diseases and the methods he developed to help patients with chronic symptoms not defined by a medical disease Throughout the book he recommends subsequent studies to test his observations and he urges full application of the scientific method to the doctor patient relationship pointing out that few objective studies of these all important interactions have ever been done
