Sustainable Development, International Aviation, and Treaty Implementation Armand L.C. de Mestral, P. Paul Fitzgerald, Md. Tanveer Ahmad, 2018-09-06 In 1944 the Chicago Convention set out the foundations of public international law regulating international air transport but until 2016 no international agreement existed to limit its environmental impact Sustainable Development International Aviation and Treaty Implementation explains why the CORSIA scheme adopted by the International Civil Aviation Organization in 2016 should be implemented in 2020 even though the adequacy of this scheme is still open to doubt and criticism This book seeks to examine the many dimensions of the effort to contain greenhouse gas emissions from aircraft in a manner consonant with the principles of sustainable development and examines the development of international law and policy in an area that has remained largely outside the general framework of international environmental law International civil aviation is a significant polluter of the atmosphere and in this volume a group of air law and sustainable development law specialists considers how the international community can respond NASA's Contributions to Aeronautics, Volume 2, Flight Environment ..., NASA/SP-2010-570-Vol 2, 2010, * Richard P. Air Navigation Law Ruwantissa Abeyratne, 2012-03-14 The aviation community in which the International Civil Aviation Organization ICAO the International Air Transport Association IATA and the Civil Air Navigation Services Organization CANSO play leading roles is hard at work in bringing aviation into the 21st Century In doing so the United States and Europe have taken proactive steps forward in introducing modernization particularly in moving towards more efficient air traffic management systems within NextGen and SESAR Elsewhere in the fields of personnel licensing rules of the air accident investigation and aeronautical charts and information significant strides are being made in moving from mere regulation to implementation and assistance calculated to make all ICAO member States self sufficient in international civil aviation However these objectives can be achieved only if the aviation industry has a sustained understanding of the legal and regulatory principles applying to the various areas of air navigation This book provides that discussion Some of the subjects discussed in this book are sovereignty in airspace flight information and air defence identification zones rules of the air personnel licensing meteorological services operations of aircraft air traffic services accident and incident investigation aerodromes efficiency aspects of aviation and environmental protection aeronautical charts and information the carriage of dangerous goods and NextGen and SESAR Except for NextGen and SESAR these subjects form the titles of the Annexes to the Chicago Convention that particularly involve the rights and liabilities of the key players involved in air navigation
