Texts and Textuality Philip G. Cohen,2018-12-20 These essays deal with the scholarly study of the genesis transmission and editorial reconstitution of texts by exploring the connections between textual instability and textual theory interpretation and pedagogy What makes this collection unique is that each essay brings a different theoretical orientation New Historicism Poststructuralism or Feminism to bear upon a different text such as Whitman s Leaves of Grass Faulkner s The Sound and the Fury or hypertext fiction to explore the dialectical relationship between texts and textuality The essays bring some of the textual theories that compete with each other today into contact with a broad range of primarily literary textual histories That texts are intrinsically unstable frequently consisting of a series of determinate historical versions has consequences for all students of literature because different versions of a literary work frequently help shape different readings independently of the interpretations brought to bear upon them Textual instability of the works is relevant to our understanding of how the meanings of texts are generated The contributors build on the numerous challenges to the Anglo American editorial tradition mounted during the past decade by scholars as diverse as Jerome McGann D F McKenzie Peter Shillingsburg D C Greetham Hershel Parker and Hans Walter Gabler The volume contributes to the paradigm shift in textual scholarship inaugurated by these scholars

A Developmental-functionalist Approach To Child Language Nancy Budwig,2013-04-15 Although there has been much empirical study within what has been referred to as functional approaches

to child language there has yet to be a major attempt to compare and contrast such proposals. In addition, much of the work carried out within child language from a functionalist perspective has not been specific with regard to the nature of the approach adopted. In attempting to fill the gap, the author of this book begins with a comparison of various functionalist approaches. By concentrating on one domain, agentivity and control, Budwig develops a set of research questions based on an examination of findings stemming from linguistics, psycholinguistics and developmental psychology and also provides an in-depth discussion of related methodological issues. In the second part of the book, she traces the development of linguistic means to refer to oneself within a developmental functionalist perspective. Individual case studies as well as group analyses of six children in the early phases of acquiring English grammar are provided. In the last part, Budwig examines the relationship between forms and functions in development with special attention to potential generalizations about the organization and reorganization of the children's linguistic systems.

Handbook of Stemmatology Philipp Roelli, 2020-09-07

Stemmatology studies aspects of textual criticism that use genealogical methods to analyse a set of copies of a text whose autograph has been lost. This handbook is the first to cover the entire field encompassing both theoretical and practical aspects of traditional as well as modern digital methods and their history. As an art, *ars stemmatology's* main goal is editing and thus presenting to the reader a historical text in the most satisfactory way. As a more abstract discipline, *scientia*, it is interested in the general principles of how texts change in the process of being copied. Thirty-eight experts from all of the fields involved have joined forces to write this handbook, whose eight chapters cover material aspects of text traditions, the genesis and methods of traditional Lachmannian textual criticism and the objections raised against it as well as modern digital methods used in the field. The two concluding chapters take a closer look at how this approach towards texts and textual criticism has developed in some disciplines of textual scholarship and compare methods used in other fields that deal with descent with modification. The handbook thus serves as an introduction to this interdisciplinary field.
