Roberts, 2019-06-28 Focusing on the Connecticut River Valley New England s longest river and largest watershed Strother Roberts traces the local regional and transatlantic markets in colonial commodities that shaped an ecological transformation in one corner of the rapidly globalizing early modern world Reaching deep into the interior the Connecticut provided a watery commercial highway for the furs grain timber livestock and various other commodities that the region exported Colonial Ecology Atlantic Economy shows how the extraction of each commodity had an impact on the New England landscape creating a new colonial ecology inextricably tied to the broader transatlantic economy beyond its shores This history refutes two common misconceptions first that globalization is a relatively new phenomenon and its power to reshape economies and natural environments has only fully been realized in the modern era and second that the Puritan founders of New England were self sufficient ascetics who sequestered themselves from the corrupting influence of the wider world Roberts argues instead that colonial New England was an integral part of Britain s expanding imperialist commercial economy Imperial planners envisioned New England as a region able to provide resources to other more profitable parts of the empire such as the sugar islands of the Caribbean Settlers embraced trade as a means to afford the tools they needed to conquer the landscape and to acquire the same luxury commodities popular among the consumer class of Europe New England s native nations meanwhile utilized their access to European trade goods and weapons to secure power and prestige in a region shaken by invading newcomers and the diseases that followed in their wake These networks of extraction and exchange fundamentally transformed the natural environment of the region creating a landscape that by the turn of the nineteenth century would have been unrecognizable to those living there two centuries

earlier Global Trade and Visual Arts in Federal New England Patricia Johnston, Caroline Frank, 2014-11-04 A highly original and much needed collection that explores the impact of Asian and Indian Ocean trade on the art and aesthetic sensibilities of New England port towns in the late eighteenth and early nineteenth centuries This diverse interdisciplinary volume adds to our understanding of visual representations of economic and cultural changes in New England as the region emerged as a global trading center entering the highly prized East Indies trades Examining a wide variety of commodities and forms including ceramics textiles engravings paintings architecture and gardens the contributors highlight New Englanders imperial ambitions in a wider world This book will appeal to a broad audience of historians and students of American visual art as well as scholars and students of fine and decorative arts

The British Raid on Essex Jerry Roberts, 2014-04-30 This is the dynamic account of one of the most destructive maritime actions to take place in Connecticut history the 1814 British attack on the privateers of Pettipaug known today as the British Raid on Essex During the height of the War of 1812 136 Royal marines and sailors made their way up the Connecticut River from warships anchored in Long Island Sound Guided by a well paid American traitor the British navigated the Saybrook shoals and advanced up the river under cover of darkness By the time it was over the British had burned twenty seven American vessels including six newly built privateers It was the largest single maritime loss of the war Yet this story has been virtually left out of the history books the forgotten battle of the forgotten war This new account from author and historian Jerry Roberts is the definitive overview of this event and includes a wealth of new information drawn from recent research and archaeological finds Lavish illustrations and detailed maps bring the battle to life

The Oxford Handbook of Maritime Archaeology Alexis Catsambis, Ben Ford, Donny L. Hamilton, 2011-04-01 The Oxford Handbook of Maritime Archaeology is a comprehensive survey of the field as seen through the eyes of nearly fifty scholars at a time when maritime archaeology has

established itself as a mature branch of archaeology This volume draws on many of the distinct and universal aspects of maritime archaeology bringing them together under four main themes the research process ships and shipwrecks maritime and nautical culture and issues of preservation and management The first section of the book deals with the best practices for locating documenting excavating and analyzing submerged sites This methodological foundation is followed by a sample of shipwreck studies from around the world as scholars trace the regional development of ships and seafaring Chosen to balance the traditional core regions of maritime archaeology with important but lesser studied areas it aims at offering an international account of the study of submerged sites Reflecting the growing number of scholars who study past maritime cultures but not shipwrecks the third section of the book addresses various aspects of the maritime landscape and ethnography above and below the water The final chapters then approach maritime archaeology in a broader context moving beyond archaeological sites to discuss the archaeological record in general within legal preservation and management frameworks Taken together these individual and original articles provide a valuable resource that summarizes the current state of the field of maritime archaeology and offers insight into the future of this established and growing discipline

Skeletons on the Zahara Dean King, 2025-05-01 A National Bestseller the true story of shipwrecked American sailors in Africa who were captured by slavers and forced to trek through the Sahara This true life saga reads like a cross between Master and Commander and Lawrence of Arabia People The western Sahara is a baking hot and desolate place home only to nomads and their camels and to locusts snails and thorny scrub and its barren and ever changing coastline has baffled sailors for centuries In August 1815 the US brig Commerce was dashed against Cape Bojador and lost although through bravery and quick thinking the ship's captain James Riley managed to lead all of his crew to safety What followed was an extraordinary and desperate battle for survival in the face of human hostility starvation dehydration death and despair Captured robbed and enslaved the sailors were dragged and driven through the desert by their new owners who neither spoke their language nor cared for their plight Reduced to drinking urine flayed by the sun crippled by walking miles across burning stones and sand and losing over half of their body weights the sailors struggled to hold onto both their humanity and their sanity To reach safety they would have to overcome not only the desert but also the greed and anger of those who would keep them in captivity From the cold waters of the Atlantic to the searing Saharan sands from the heart of the desert to the heart of man Skeletons on the Zahara is a spectacular odyssey through the extremes and a gripping account of courage brotherhood and survival A little bit H Rider Haggard a little bit Jon Krakauer a little bit Nathaniel Philbrick and a whole lot of gruesome fun Salon
