The 3 Worlds Of Leonid:

The Three Worlds of Boris Pasternak Robert Payne, 1962 *Young Jewish Poets Who Fell as Soviet Soldiers in the Second World War* Rina Lapidus, 2014-09-15 This book deals with the work of fifteen young Jewish poets who were killed or died of wounds or were executed in captivity while serving in the Red Army in the Second World War. All were young, all were poets, most were thoroughly assimilated into Soviet society whilst at the same time being rooted in Jewish culture and traditions. Their poetry, written mostly in Russian, Yiddish and Ukrainian, was coloured by their backgrounds, by the literary and cultural climate that prevailed in the Soviet Union and was deeply concerned with their expectation of impending death at the hands of the Nazis. The book examines the poets' backgrounds, their lives, their poetry and their deaths. Like the experiences and poetry of the British First World War poets, the lives and poems of these young Jewish poets are extremely interesting and deeply moving.

The Routledge Companion to Big History Craig Benjamin, Esther Quaedackers, David Baker, 2019-08-01 The Routledge Companion to Big History guides readers through the variety of themes and concepts that structure contemporary scholarship in the field of big history. The volume is divided into five parts, each representing current and evolving areas of interest to the community, including big history's relationship to science, social science, the humanities and the future, as well as teaching big history and little big histories. Considering an ever-expanding range of theoretical, pedagogical and research topics, the book addresses such questions as: what is the relationship between big history and scientific research; how are big historians working with philosophers and religious thinkers to help construct meaning; how are leading theoreticians making sense of big history and its relationship to other creation narratives and paradigms; what is little big history and how does big history impact on thinking about the future. The book highlights the place of big history in historiographical traditions and the ways in which it can be used in education and public discourse across disciplines and at all levels. A timely collection with contributions from leading proponents in the field, it is the ideal guide for those wanting to engage with the theories and concepts behind big history.
