Revolution in the Highlands Stephen C. Averill, 2006-11-06 This extensively researched and elegantly written study offers a fine grained analysis of the origins of the Chinese Communist Revolution in the countryside Building on decades of research in newly available sources and multiple trips to Jiangxi Stephen Averill provides a definitive local perspective on the rise of a revolution that reshaped China and the world A rich work of social history it goes beyond recently popular organizational approaches to explore the ways in which the party and social networks interpenetrated and interacted in the early stages of revolutionary base building The Jinggangshan highlands provided the base for Mao Zedong's first efforts at rural revolution Chinese histories and most Western accounts have focused on the heroic exploits of Mao and his Communist Party comrades battling the natural elements hostile military forces and skeptical authorities in the urban based Communist Central Committee This long awaited work penetrates the hagiographic haze of Mao centered analysis to provide a close narrative and rich social history of the Jinggangshan base The author explores the historical patterns of local strongman rule clientelist politics lineage conflict and ethnic struggle within which the party competed for power Through this multifaceted lens the revolutionary experience in Jinggangshan is equally dramatic but considerably more sobering than the conventional story Among Western studies of the Chinese revolution this work stands out as the definitive account of the critical moment in the 1920s when the physical and ideological center of the Communist movement shifted from the cities to the countryside This was a process of elite mediated political osmosis and adaptive compromises with local traditions The party was not simply an outside force manipulating social tensions for its own political ends There was instead an intricate interweaving of local networks and social cleavages in the highlands with the political structures and policy divisions of the

Revolution as Reformation Peter C. Messer, William Harrison Taylor, 2021-01-19 Essays that explore how Protestants responded to the opportunities and perils of revolution in the transatlantic age Revolution as Reformation Protestant Faith in the Age of Revolutions 1688 1832 highlights the role that Protestantism played in shaping both individual and collective responses to revolution These essays explore the various ways that the Protestant tradition rooted in a perpetual process of recalibration and reformulation provided the lens through which Protestants experienced and understood social and political change in the Age of Revolutions In particular they call attention to how Protestants used those changes to continue or accelerate the Protestant imperative of refining their faith toward an improved vision of reformed religion The editors and contributors define faith broadly they incorporate individuals as well as specific sects and denominations and as much of life experience as possible not just life within a given church In this way the volume reveals how believers combined the practical demands of secular society with their personal faith and how in turn their attempts to reform religion shaped secular society The wide ranging essays highlight the exchange of Protestant thinkers traditions and ideas across the Atlantic during this period These perspectives reveal similarities between revolutionary movements across and around the Atlantic The essays also emphasize the foundational role that religion played in people's attempts to make sense of their world and the importance they placed on harmonizing their ideas about religion and politics These efforts produced novel theories of government encouraged both revolution and counterrevolution and refined both personal and collective understandings of faith and its relationship to society *The Ab Revolution* Jolie Bookspan, 2003 **Ab Revolution** Jolie Bookspan, 2002-05-01
