includes new material reflecting current advances in such topics as salience cline for discourse rhetorical relations paragraph structures transitivity ergativity agency hierarchy and word order typologies

He may not have been a natural in the ring, but he worked as hard as any boxer to learn his craft, to be in top condition, and he repeatedly showed that he was tougher than nails. This biography details Carnera's early life and boxing career, his success as a fighter, as well as accusations of fight fixing, his strengths and limitations in the ring, and his later career as a wrestler.

"The Bigger They Are, the Harder They Fall" Paul G. J. O'Connell, Shang-Jin Wei, 1997. Recent empirical work has made headway in exploring the non-linear dynamics of deviations from the law of one price and purchasing power parity that are apt to arise from transaction costs. However, there are two important facets of this work that need improvement. First, the choice of empirical specification is arbitrary. Second, the data used are typically composite price indices which are subject to potentially serious aggregation biases. This paper examines the evidence for transport cost induced nonlinear price behavior within the U.S. We address both of the above shortcomings. First, we use a simple continuous time model to inform the choice of empirical specification. The model indicates that the behavior of deviations from price parity depends on the relative importance of fixed and variable transport costs. Second, we employ data on disaggregated commodity prices, yielding a pure measure of the deviations from price parity. We find strong evidence of nonlinear reversion in these deviations. The nature of this reversion suggests that fixed costs of transportation are integral to an understanding of law of one price deviations.
