Katlic, 2011-07-12 In the preface to this impressive and well produced book the editors state that their aim is not to describe a new surgical specialty since most surgeons will soon need to be geriatric surgeons but to assemble a comprehensive account that will allow all providers of healthcare to the elderly to understand the issues involved in choosing surgery as a treatment option for their patients This is a useful book that deserves to do well I hope that the editors and their publisher will have the stamina to make this the first of several editions as it is clear that updated information about surgery in the elderly will be required to keep pace with this important field NEJM Book Review *From Cancer Patient to Cancer Survivor* National Research Council, Institute of Medicine, National Cancer Policy Board, Committee on Cancer Survivorship: Improving Care and Quality of Life, 2005-12-01 With the risk of more than one in three getting cancer during a lifetime each of us is likely to experience cancer or know someone who has survived cancer Although some cancer survivors recover with a renewed sense of life and purpose what has often been ignored is the toll taken by cancer and its treatment on health functioning sense of security and well being Long lasting effects of treatment may be apparent shortly after its completion or arise years later The transition from active treatment to post treatment care is critical to long term health *From Cancer Patient to Cancer Survivor* focuses on survivors of adult cancer during the phase of care that follows primary treatment The book raises awareness of the medical functional and psychosocial consequences of cancer and its treatment It defines quality health care for cancer survivors and identifies strategies to achieve it The book also recommends improvements in the quality of life of cancer survivors through policies that ensure their access to psychosocial services fair employment practices and health insurance This book will be of particular interest to cancer patients and their advocates health care providers and their leadership health insurers employers research sponsors and the public and their elected representatives **Genomes 3** Terence A.
