Sinkyone Notes Gladys Ayer Nomland, California Indian Library Collections Project, 1935 **The Left Coast** Philip L. Fradkin, 2011-06-21 Philip L. Fradkin one of California's most acclaimed environmental historians felt drawn to the coast as soon as he arrived in California in 1960. His first book *California The Golden Coast* captured the wonder of the shoreline's natural beauty along with the controversies it engendered. In *The Left Coast* the author and his photographer son Alex Fradkin revisit some of the same places they explored together in the early 1970s. From their written and visual approaches this father-son team brings a unique generational perspective to the subject. Mixing history, geography, interviews, personal experiences, and photographs they find a wealth of stories and memorable sights in the multiplicity of landscapes defined by them as the Wild, Agricultural, Residential, Tourist, Recreational, Industrial, Military, and Political coasts. Alex Fradkin's expressive photographs add a layer of meaning, enriching the subject with their distinctive eloquence while bringing a visual dimension to his father's words. In this way the book becomes the story of a close relationship within a probing study of a varied and contested coastline.

The Tanoak Tree Frederica Bowcutt, 2015-05-15 Tanoak (*Notholithocarpus densiflorus*) is a resilient and common hardwood tree native to California and southwestern Oregon. People's radically different perceptions of it have ranged from treasured food plant to cash crop to trash tree. Having studied the patterns of tanoak use and abuse for nearly twenty years, botanist Frederica Bowcutt uncovers a complex history of cultural, sociopolitical, and economic factors affecting the tree's fate. Still valued by indigenous communities for its nutritious acorn nut, the tree has also been a source of raw resources for a variety of industries since white settlement of western North America. Despite ongoing protests, tanoaks are now commonly killed with herbicides in industrial forests in favor of more commercially valuable coast redwood and Douglas fir. As one nontoxic alternative, many foresters and communities promote locally controlled, third-party certified sustainable hardwood production using tanoak, which doesn't depend on clearcutting and herbicide use. Today tanoaks are experiencing massive die-offs due to sudden oak death, an introduced disease. Bowcutt examines the complex set of factors that set the stage for the tree's current ecological crisis. The end of the book focuses on hopeful changes, including reintroduction of low-intensity burning to reduce conifer competition for tanoaks, emerging disease resistance in some trees, and new partnerships among tanoak defenders, including botanists, foresters, Native Americans, and plant pathologists. California. University. Press, University of California Press, 1944 Western Apache Heritage Richard J. Perry, 2014-04-21 A reconstruction of Apachean history and culture that sheds much light on the origins, dispersions and relationships of Apache groups. Mention Apaches and many Anglo Americans picture the marauding savages of western movies or impoverished reservations beset by a host of social problems. But like most stereotypes these images distort the complex history and rich cultural heritage of the Apachean peoples who include the Navajo as well as the Western Chiricahua, Mescalero, Jicarilla, Lipan and Kiowa Apaches. In this pioneering study Richard Perry synthesizes the findings of anthropology, ethnology, linguistics, archaeology and ethnohistory to reconstruct the Apachean past and offer a fuller understanding of the forces that have shaped modern Apache culture. While scholars generally agree that the Apacheans are part of a larger group of Athapaskan speaking peoples who originated in the western Subarctic, there are few archaeological remains to prove when, where and why those northern cold dwellers migrated to the hot deserts of the American Southwest. Using an innovative method of ethnographic reconstruction, however, Perry hypothesizes that these nomadic hunters were highly adaptable and used to exploiting the resources of a wide range of mountainous habitats. When changes in their surroundings forced the ancient Apacheans to expand their food quest, it was natural for them to migrate down the mountain corridor formed by the Rocky Mountain chain. Perry is the first researcher to attempt such an extensive reconstruction and his study is the first to deal with the full range of Athapaskan speaking peoples. His method will be instructive to students of other cultures who face a similar lack of historical and archaeological data. Markstrom, 2008-01-01 Empowerment of North American Indian Girls is an examination of coming of age ceremonies for American Indian girls past and present, featuring an in depth look at Native ideas about human development and puberty. Many North American Indian cultures regard the transition from childhood to adulthood as a pivotal and potentially vulnerable phase of life and have accordingly devised coming of age rituals to affirm traditional values and community support for its members. Such rituals are a positive and enabling social force in many modern Native communities whose younger generations are wrestling with substance abuse, mental health problems, suicide and school dropout. Developmental psychologist Carol A. Markstrom reviews indigenous historical and anthropological literatures and conveys the results of her fieldwork to provide descriptive accounts of North American Indian coming of age rituals. She gives special attention to the female puberty rituals in four communities: Apache, Navajo, Lakota and Ojibwa. Of particular interest is the distinctive Apache Sunrise Dance which is described and analyzed in detail. Also included are American Indian feminist interpretations of menstruation and menstrual taboos, the feminine in cosmology and the significance of puberty customs and
