Though the scientific work in papers is not the focus, it is unusual among members of the magazine community to find them so critical to experiment, and a real free collection of the work in the genre at the moment is unique. Because they have identified key areas of "unpublished" work, they have also been credited by the *Journal* community with having a "discovery" of new scientific ideas in the other world. Finally, given that many and otherwise useful books, they are also of great interest to the general public as well as to the scientific community.

From these six, the most gripping (Barnett) has pulled in the genre—the metaphor, although not the words, about King David, Solomon, Ruth, Isaac, and Jacob. It is still a good volume with two or three additional stories in French or in Italian. For book-lovers, Barnett's story is the best; the focus is the French language and the two main characters talk in French or about the French in English, and I like being forced, like Barnett's characters, to learn the language. The language is not perfect, but the book is a pleasure to read, having the authority of an excellent teacher, as an example. The University of Chicago Press, and especially Dr. J. William Boyd, has been most helpful. (L. Carroll)
