Speaking of Values Irene E. Schoenberg,2003-08 Speaking of Values stimulates lively conversations about cultural and personal beliefs Step by step students build confidence in their ability to express themselves in English while developing vocabulary and critical thinking skills *Speaking of Values 1*(2□) □□□,2003-10-06 **Speaking**

Of Values Fossey McLennan And Walsh,2016-11-20 Values are essentially motivations sets of beliefs and principles that guide how we live our lives They are complex and multi dimensional They can be personal familial communal social cultural political organisational local global moral spiritual and material Some values are owned by us e g our personal values and some are given to us e g organisational values As explorers it is all too easy to think of values simply as a compass helping us to navigate our way through life But this only tells part of the story This publications explores values and our journey with values through sixteen different life stories Each story contains very different backgrounds and values journeys that help collectively to reflect on modern society Profits from this book will go to charities chosen by the case study contributors

Is Nature Ever Evil? Willem B. Drees,2003-09-02 Can nature be evil or ugly or wrong Can we apply moral value to nature From a compellingly original premise under the auspices of major thinkers including Mary Midgley Philip Hefner Arnold Benz and Keith Ward *Is Nature Ever Evil* examines the value structure of our cosmos and of the science that seeks to describe it Science says editor Willem B Drees claims to leave moral questions to aesthetic and religious theory But the supposed neutrality of the scientific view masks a host of moral assumptions How does an ethically transparent science arrive at concepts of a hostile universe or a selfish gene How do botanists zoologists cosmologists and geologists respond to the beauty of the universe they study reliant as it is upon catastrophe savagery power and extinction Then there are various ways in which science seeks to alter and improve nature What do prosthetics and gene technology cyborgs and dairy cows say about our appreciation of nature itself Surely science in common with philosophy magic and religion can aid our understanding of evil in nature whether as natural catasrophe disease predatory cruelty or mere cosmic indifference

Focusing on the ethical evaluation of nature itself *Is Nature Ever Evil* re ignites crucial questions of hope responsibility and possibility in nature *Values of Love and Ethical Reflection* Edmund Husserl,2024-12-20 This first volume of Husserlian Legacies Themes for the 21st Century focuses on hitherto underexamined dimensions of Husserl s philosophical thinking and in particular values and love Texts in this series draw from the variety of Husserl s rich original works they are selected and arranged with the support of the Husserl Archives Leuven The texts are made available in English and are primarily targeted to advanced undergraduates graduate students and scholars This volume helps the reader both to investigate the themes of

value and love and to gauge their role in Husserl's reflections on related topics his analysis of philosophy the sciences as vocational tasks the emotions and the community of love as well as his personalistic reformulation of the categorical imperative The texts gathered edited and translated in this volume have far reaching implications ranging from axiology and individual and social ethics to the philosophy of emotions action theory and the philosophy of science

Essays of a Biologist Julian Huxley, 2021-11-05 In *Essays of a Biologist* Julian Huxley offers a compelling collection of essays that bridge the realms of biological science and philosophical inquiry The literary style is characterized by Huxley's eloquence and clarity as he adeptly weaves complex scientific concepts with profound humanistic reflections From evolutionary theory to the implications of genetics Huxley situates his discussions within the broader context of 20th century science and its ethical ramifications providing readers not only with an understanding of biological processes but also their significance in shaping human existence Julian Huxley was a prominent biologist writer and advocate of science in an era marked by rapid advancements and public skepticism towards scientific innovations As a key figure in the early development of evolutionary synthesis Huxley's insights are deeply informed by his extensive research and commitment to unveiling the interconnectedness of life His experiences including his involvement with the British Natural History Museum and the World Wildlife Fund further shaped his perspectives leading him to explore the implications of biology on society and the environment *Essays of a Biologist* is a must read for anyone interested in the intersection of science and philosophy Huxley's incisive prose not only stimulates intellectual curiosity but encourages a profound appreciation for the complexity of life making it an essential addition to the libraries of scientists scholars and lay readers alike

The Modern Language Journal, 1919 Includes section Reviews

Principles of Economics Edwin Robert Anderson Seligman, 1919 [Sessional Papers](#) Great Britain. Parliament. House of Commons, 1900

Phenomenology 2010 Yu Chung-Chi, 2010

Substantive Minority Representation in Parliament Lea Ewe Bönisch, 2025-05-21 This book explores why members of parliament MPs substantively represent minorities with invisible characteristics those lacking outwardly recognizable features This invisibility complicates the representational relationship as minority members often do not publicly self identify leaving MPs unaware of their electorate's composition and citizens uninformed about MPs affiliations Studies on those minorities yield mixed results on the importance of minority membership for MPs legislative behaviour Analysing sexual minorities representation this work attempts to provide a clearer picture Moreover it looks at political values and awareness as additional explanatory factors Both parts a quantitative analysis of parliamentary questions and a comparative case study of legislative processes regarding same sex marriage reveal that minority membership significantly affects individual and macro level substantive representation with political values and awareness being at play too Overall this book adds conceptual theoretical and empirical insights to research on representation legislative studies and comparative politics in general Thereby this study provides important clues on how the integration of minority interests in liberal democracies can succeed

Leo Strauss, Max Weber, and the Scientific Study of Politics Nasser Behnegar, 2005-07 Can politics be studied scientifically and if so how Assuming it is impossible to justify values by human reason alone social science has come to consider an unreflective relativism the only viable basis not only for its own operations but for liberal societies more generally Although the experience of the sixties has made social scientists more sensitive to the importance of values it has not led to a fundamental reexamination of value relativism which remains the basis of contemporary social science Almost three decades after Leo Strauss's death Nasser Behnegar offers the first sustained exposition of what Strauss was best known for his radical critique of contemporary social science and particularly of political science Behnegar's impressive book argues that Strauss was not against the scientific study of politics but he did reject the idea that it could be built upon political science's unexamined assumption of the distinction between facts and values Max Weber was for Strauss the most profound exponent of values relativism in social science and Behnegar's explication artfully illuminates Strauss's critique of Weber's belief in the ultimate insolubility of all value conflicts Strauss's polemic against contemporary political science was meant to make clear the contradiction between its claim of value free premises and its commitment to democratic principles As Behnegar ultimately shows values the ethical component lacking in a contemporary social science are essential to Strauss's project of constructing a genuinely scientific study of politics

Crosscultural Communication N.L. Gupta, 1998 This Book Provides A Global Perspective To The Cross Cultural Communication Besides Presenting Conceptual Analysis It Discusses At Length The Cultural Pluralism Multi Religious Communication Religion And Politics Socio Economic Inter Dependence Cross Currents In Philosophy Art And Literature And Human Values

Value, Beauty, and Nature Brian G. Henning, 2023-12-01 Much of early environmental ethics was born out of the belief that the ecological crisis can only truly be solved by overcoming a pernicious worldview that limits all intrinsic value to human beings Returning to this originating impulse Value Beauty and Nature contends that to make progress within environmental ethics philosophers must explicitly engage in environmental metaphysics Grounded in an organicist process worldview Brian G Henning shows that it is possible to make progress in key debates within environmental philosophy including those concerning the nature of intrinsic value anthropocentrism hierarchy the moral significance of beauty the nature of individuality teleology and the naturalistic fallacy and worldview reconstruction A Whiteheadian fallibilistic naturalistic event ontology allows for the recovery of systematic speculative metaphysical thought without a revanchist movement toward a necessitarian philosophia perennis Thus in contrast to the claims of environmental pragmatists Value Beauty and Nature demonstrates that environmental ethics would greatly benefit from an adequate metaphysical foundation and of the candidate metaphysical systems Alfred North Whitehead's philosophy of organism is the most adequate

Climate change and sustainable development Thomas Potthast, Simon Meisch, 2012-08-13 Climate change is a major framing condition for sustainable development of agriculture and food Global food production is a major contributor to global greenhouse gas emissions and at the same time it is among

the sectors worst affected by climate change This book brings together a multidisciplinary group of authors exploring the ethical dimensions of climate change and food Conceptual clarifications provide a necessary basis for putting sustainable development into practice Adaptation and mitigation demand altering both agricultural and consumption practices Intensive vs extensive production is reassessed with regard to animal welfare efficiency and environmental implications Property rights pay an ever increasing role as do shifting land use practices agro energy biotechnology food policy to green consumerism And last but not least tools are suggested for teaching agricultural and food ethics Notwithstanding the plurality of ethical analyses and their outcome it becomes apparent that governance of agri food is faced by new needs and new approaches of bringing in the value dimension much more explicitly This book is intended to serve as a stimulating collection that will contribute to debate and reflection on the sustainable future of agriculture and food production in the face of global change

Computer Vision - ECCV 2016 Bastian Leibe, Jiri Matas, Nicu Sebe, Max Welling, 2016-09-15 The eight volume set comprising LNCS volumes 9905-9912 constitutes the refereed proceedings of the 14th European Conference on Computer Vision ECCV 2016 held in Amsterdam The Netherlands in October 2016 The 415 revised papers presented were carefully reviewed and selected from 1480 submissions The papers cover all aspects of computer vision and pattern recognition such as 3D computer vision computational photography sensing and display face and gesture low level vision and image processing motion and tracking optimization methods physics based vision photometry and shape from X recognition detection categorization indexing matching segmentation grouping and shape representation statistical methods and learning video events activities and surveillance applications They are organized in topical sections on detection recognition and retrieval scene understanding optimization image and video processing learning action activity and tracking 3D and 9 poster sessions School Education in Rural India Ved Prakash, 1993 Contributed papers
