Special Capacity:

Criminalization Antony Duff, Lindsay Farmer, Sandra E. Marshall, Massimo Renzo, Victor Tadros, 2014 The Criminalization series arose from an interdisciplinary investigation into criminalization focusing on the principles that might guide decisions about what kinds of conduct should be criminalized and the forms that criminalization should take Developing a normative theory of criminalization the series tackles the key questions at the heart of the issue what principles and goals should guide legislators in deciding what to criminalize How should criminal wrongs be classified and differentiated How should law enforcement officials apply the law s specifications of offences The fourth book in the series examines the political morality of the criminal law exploring general principles and theories of criminalization Chapters provide accounts of the criminal law in the light of ambitious theories about moral and political philosophy republicanism and contractarianism or reflect upon on the success of important theories of criminalization by viewing them in a novel light Ideas that are fundamental to any complete theory of the criminal law liberty harm and the effect on victims are investigated in depth Sociological investigation of the criminal law grounds a critical investigation into the principles of criminalization both as a legislative matter and with respect to criminalization practices in contemporary and historical contexts The volume broadens our conceptions of the theory of criminalization and clarifies the role of the series in the development of this theory It is essential reading for all interested in legal political and social theories of criminalization Official Gazette of the United States Patent Office United States. Patent Office, 1904

Symplectic Invariants and Hamiltonian Dynamics Helmut Hofer, Eduard Zehnder, 2011-03-31 The discoveries of the last decades have opened new perspectives for the old field of Hamiltonian systems and led to the creation of a new field symplectic topology Surprising rigidity phenomena demonstrate that the nature of symplectic mappings is very different from that of volume preserving mappings This raises new questions many of them still unanswered On the other hand analysis of an old variational principle in classical mechanics has established global periodic phenomena in Hamiltonian systems As it turns out these seemingly different phenomena are mysteriously related One of the links is a class of symplectic invariants called symplectic capacities These invariants are the main theme of this book which includes such topics as basic symplectic geometry symplectic capacities and rigidity periodic orbits for Hamiltonian systems and the action principle a bi invariant metric on the symplectic diffeomorphism group and its geometry symplectic fixed point theory the Arnold conjectures and first order elliptic systems and finally a survey on Floer homology and symplectic homology The exposition is self contained and addressed to researchers and students from the graduate level onwards

Teaching Language Arts in Middle Schools Sharon Kingen, 2000-02 Primary text for middle school language arts methods courses Presents balanced attention to various teaching strategies processes and content demonstrating how all of these connect to improve students abilities to communicate

Civil Rights, 1968 **Critical comparison of major seismic codes for buildings** fib Fédération internationale du béton, 2013-01-01 fib Bulletin 69 illustrates and compares major buildings seismic codes applied in the different Continents namely U S Japan New Zealand Europe Canada Chile and Mexico Bulletin 69 was prepared by Task Group 7.6 of fib Commission 7 under the leadership of the late Professor Robert Bob Park which in tandem with Professor Paulay had developed in the seventies new fundamental design concepts most notably capacity design approach and structural design for ductility that had made the NZ seismic Code the most advanced one of the time This new approach has highly influenced the development of Eurocode 8 to which Bob Park has significantly contributed Bob Park was also well informed of the situation in Japan USA Canada and South America Such a wide view is reflected in Bulletin 69 showing similarities and differences among the major seismic codes accompanied as far as possible by comments hopefully useful for fostering international harmonization A comprehensive summary of the major codes is provided in the first chapter of the bulletin All codes are separately presented according to a common framework an introduction section which describes the history the philosophy the process development the performance based criteria the strength of materials and the incorporation of strength reduction factors of each code a second section devoted to the demand side which specifies the seismic design actions and associated criteria of each code for areas of different seismicity and for structures with different ductility properties requirements a third section devoted to the capacity side which describes the capacities of members and joints and associated criteria of each code including member strengths in flexure shear and bars anchorage desirable hierarchies of strength attainment deformation capacities of mechanisms of inelastic deformation detailing of beams columns and structural walls detailing of beam column joints for shear and the detailing of diaphragms The second chapter is devoted to the comparison of the more significant issues dealt in the considered codes This includes seismic design actions and associated criteria capacity design practice beams columns confinement structural walls and joints It is felt that fib Bulletin 69 represents a useful unique instrument for rapidly gaining an overview of the distinguishing features of the major world codes under both their conceptual framework and application rules **War Powers** Mariah Zeisberg, 2015-09-01 Armed interventions in Libya Haiti Iraq Vietnam and Korea challenged the US president and Congress with a core question of constitutional interpretation does the president or Congress have constitutional authority to take the country to war War Powers argues that the Constitution doesn't offer a single legal answer to that question But its structure and values indicate a vision of a well functioning constitutional politics one that enables the branches of government themselves to generate good answers to this question for the circumstances of their own times Mariah Zeisberg shows that what matters is not that the branches enact the same constitutional settlement for all conditions but instead how well they bring their distinctive governing capacities to bear on their interpretive work in context Because the branches legitimately approach constitutional questions in different ways interpretive conflicts between them can sometimes indicate a successful rather than deficient

interpretive politics Zeisberg argues for a set of distinctive constitutional standards for evaluating the branches and their relationship to one another and she demonstrates how observers and officials can use those standards to evaluate the branches constitutional politics With cases ranging from the Mexican War and World War II to the Cold War Cuban Missile Crisis and Iran Contra scandal War Powers reinterprets central controversies of war powers scholarship and advances a new way of evaluating the constitutional behavior of officials outside of the judiciary

The Long Night of Dark Intent Irving Horowitz, 2017-07-05 The Cuban Revolution of 1959 was a benchmark of triumph and a harbinger of tragedy to come Rather than herald a new era of Cuba joining the world community of nations as a paragon of democracy as many fervently hoped and believed it would it became instead a new stage in authoritarian rule in the Western hemisphere For more than a half century since then Cuba has been defined by the capacity of a single family to command and determine the fate of a nation and to do so with a minimum of opposition Incredibly even those professing adhesion to democratic norms have been ready to forgive the dictator his excesses This volume explains the theory and practice of this absence of internal opposition and the persistence of external support for the Castro family and its entourage The Long Night of Dark Intent is chronological in order with the author indicating major points in each of the five decades covered The volume covers five centers of system analysis economics politics society military and ideology Who or what determines events and decisions is the stuff of real history It is precisely due to variability in causal chains in society that we have huge variance in levels of predictability The course of the Cuban Revolution gives strong support for such an approach to the Castro Era This is a unique unflinching account with a strong emphasis on the importance of U S policy decisions over time

Water Related Education, Training and Technology Transfer Andre van der Beken, 2009-07-23 Water Related Education Training and Technology Transfer is a component of Encyclopedia of Water Sciences Engineering and Technology Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias Learning processes offer knowledge skills and competencies to the individual through different methods of education and training The learning society and the concept of lifelong learning form the basis for the so called knowledge based economy Since water resources development and management are an essential part of this economy education training and transfer of technology for water resources should be seen as important aspects of societal policies for a sustainable future This book starts with a little history and introduces several issues related to water resources in the learning environment What does the water profession expect from education We must consider the methods and tools used the need to match demand and supply and quality assessment of education and training Transfer of technology to close the technology gap between countries can only be effective if an enabling learning environment exists Capacity building must ensure that this environment is sustainable This volume is aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs
