

Classroom chaos

Rows of desks and lighting can make it difficult for a hearing impaired child to take in those all-important visual cues when a fellow student or the teacher is talking

Solution: U-shaped seating and considering where the teacher stands when giving a class

1

Face time

If the teacher continues to talk while handing out papers, or if the hearing impaired child has to write reams of notes this can make it hard for them to focus on what is being said

Solution: Face the child directly and provide notes so they can engage more during the lesson

2

Fitting in

Hearing impaired children most often don't want to draw attention to the fact that they have hearing loss and this can make them retreat into themselves in large group environments

Solution: Arrange smaller groups for classrooms and/ or social events to help a child feel more at ease

Starting the School Year Well And What To Do If Things Go Awry Diane Adreon, Brenda Smith Myles, 2025-07-15 Most students thrive on consistency and it s especially important for autistic students Without it teachers can expect them to experience higher levels of anxiety and more meltdowns Because of their neurology autistic students learn best when they know exactly what they are going to do when they are going to do it and with whom they will do it Despite knowledge and well intended efforts educational systems often create a lack of predictability for students when they transition from year to year Teachers certainly try They ve read last year s IEP took part in creating a new one and have read all the information in the student s file But they still don t know details such as what the student s mini schedule looks like and what prompts are needed to support social interaction Until now Starting the School Year Well provides a simple way for teachers to learn from past educators through the completion of three simple to use instruments Transition Checklist Comprehensive Autism Planning System Learner Snapshot These tools allow educators to immediately implement effective strategies instead of spending time engaged in trial and error instruction These instruments create a smoother transition that enhances learning Also included is an extensive approach to behavior challenges that results in real change If behavior challenges occur use this student and teacher friendly approach to teach new behaviors and provide support By eliminating guesswork as you get to know a student at the beginning of the year you can get right to work teaching them new skills that match how they learn
