Special Operations Forces An Assessment:

Special Operations Forces John M. Collins, 1994-11 In this volume John Collins speaks with the authority of one who was literally present at the birth of the low intensity conflict era His long term intimate and direct contact with the esoteric world of special operations has few parallels Their roots go back in time and history considerably farther but today s Special Operations Forces are largely products of the past three decades Their development has been in response to the pressures of world wide situations perceived to bear upon or which actually do affect American strategic interests The use of raw military power may not provide solutions to the complex problems involved and may even be counter productive Special Operations forces uniquely suited to fill the quasi military gap require the highest degree of professional competence in the application of the classical principles of war This is a big order It is difficult in a few words to pay John Collins the tribute he deserves for continuing efforts to educate both the Congress and the U S Armed Forces concerning the capabilities and limitations of special operations and the forces they involve This latest addition to his carefully researched studies combines history philosophy factual data and reference materials in a single document that should be on the desks of civilian and military leaders whose responsibilities relate in any way to special operations

An Assessment of Assessment: Is Selective Manning Right for USAF Special Operations Aircrew? , 1995 The United States Army Navy and Air Force all provide special operations forces to United States Special Operations Command USSOCOM Two of these three services the Army and the Navy conduct rigorous assessment programs in their selection of special operations force SOF personnel The US Air Force conducts no special assessment program neither psychological nor physical in selection of SOF aircrew personnel Both the Army and Navy stress a psychological assessment phase This paper examines several psychological assessment vehicles such as the Minnesota Multiphasic Personality Inventory and the Sixteen Personality Factor test which could be integrated into a program that would select Air Force SOF aircrew based on among other things an individuals psychological predisposition Historically psychological assessment has proven effective since the days of World War II and today both the Army and Navy continue to successfully man their SOF forces with personnel who are motivated disciplined focused and unrelenting in pursuit of mission accomplishment The US Air Force needs to give the same effort to selecting personnel for SOF as does the Army and Navy Only when all three services impose the same demanding requirements for SOF personnel will SOCOM have a special operations force capable of succeeding anytime anyplace

Special Operations Forces United States, Government Accountability Office, 2007 *U.S. Special Operations Forces in the Philippines, 2001-2014* Linda Robinson, Patrick B. Johnston, Gillian S. Oak, 2016-04-06 This report examines the 2001 2014 experience of U S special operations forces in the Philippines and the activities and effects of special operations capabilities employed to address terrorist threats in Operation Enduring Freedom Philippines United States Special Operations Forces David Tucker, Christopher J. Lamb, 2007-09-04 In October and November of 2001 small numbers of

soldiers from the Army Special Forces entered Afghanistan linked up with elements of the Northern Alliance an assortment of Afghans opposed to the Taliban and in a remarkably short period of time destroyed the Taliban regime Trained to work with indigenous forces and personnel like the Northern Alliance these soldiers sometimes riding on horseback combined modern military technology with ancient techniques of central Asian warfare in what was later described as the first cavalry charge of the twenty first century In this engaging book two national security experts and Department of Defense insiders put the exploits of America's special operation forces in historical and strategic context David Tucker and Christopher J Lamb offer an incisive overview of America's turbulent experience with special operations Using in depth interviews with special operators at the forefront of the current war on terrorism and providing a detailed account of how they are selected and trained the authors illustrate the diversity of modern special operations forces and the strategic value of their unique attributes From the first chapter this book builds toward a set of recommendations for reforms that would allow special operations forces to make a greater contribution to the war on terrorism and play a more strategic role in safeguarding the nation's security Along the way the authors explain why special operations forces are Distinguished by characteristics not equally valued by their own leadership Strategically crucial because of two mutually supporting but undeniably distinct sets of capabilities not found in conventional forces Not to be confused with the CIA and so called paramilitary forces nor with the Marines and other elite forces Unable to learn from the 1993 failed intervention in Somalia and the national oversight issues it revealed Better integrated into the nation's military strategy and operations than ever before but confused about their core missions in the war on terror Not transformed for future challenges as many assert but rather in need of organizational reforms to realize their strategic potential Despite longstanding and growing public fascination with special operators these individuals and the organizations that employ them are little understood With this book Tucker and Lamb dispel common misconceptions and offer a penetrating analysis of how these unique and valuable forces can be employed to even better effect in the future

United States Special Operations Forces Posture Statement U.S. Special Operations Command, 2003 An Assessment Of Assessment, 1909 Author's abstract The United States Army Navy and Air Force all provide special operations forces to United States Special Operations Command USSOCOM Two of these three services the Army and the Navy conduct rigorous assessment programs in their selection of special operations force SOF personnel The US Air Force conducts no special assessment program neither psychological nor physical in selection of SOF aircrew personnel Both the Army and Navy stress a psychological assessment phase This paper examines several psychological assessment vehicles such as the Minnesota Multiphasic Personality Inventory and the Sixteen Personality Factor test which could be integrated into a program that would select Air Force SOF aircrew based on among other things an individual's psychological predisposition Historically psychological assessment has proven effective since the days of World War II and today both the Army and Navy continue to successfully man their SOF forces with personnel who are motivated disciplined

focused and unrelenting in pursuit of mission accomplishment The US Air Force needs to give the same effort to selecting personnel for SOF as does the Army and Navy Only when all three services impose the same demanding requirements for SOF personnel will SOCOM have a special operations force capable of succeeding anytime anyplace

Special Operations Forces in the 21st Century Jessica Glicken Turnley, Kobi Michael, Eyal Ben-Ari, 2017-08-09 This book sets out the major social scientific approaches to the study of Special Operations Forces Despite consistent downsizing over the past two decades the armed forces of the industrial democracies have seen a huge growth in Special Operations Forces SOF Through increasing numbers of personnel and more frequent deployments SOF units have wielded considerable influence in conflicts around the world with senior SOF officers having led major strategic operations This increased presence and unprecedented expansion for SOF is largely a result of the new kinds of conflicts that have emerged in the 21st century At the same time even with this high profile in the military policy and media and popular cultural arenas there is relatively little social scientific research on SOF This volume aims to fill this gap by providing a series of studies and analyses of SOF across the globe since the end of World War II Analysing SOF at the micro mezzo and macro levels provides broad and diverse insights Moreover the volume deals with new issues raised by the use of such forces that include emerging modes of civilian control innovative organizational forms and the special psychological characteristics necessitated by SOF operatives It concludes with a discussion of a question which continues to be debated in today's militaries what makes SOF special Filling a clear gap in the literature this book will be of much interest to students of strategic studies civil military relations irregular warfare security studies and international relations
