Four Centuries of Special Geography O.F.G. Sitwell, 2011-11-01 Geography as an academic discipline dates back to the last few decades of the nineteenth century However during the preceding centuries a large body of English language literature relevant to the field of special geography was published Four Centuries of Special Geography lists all the works published before 1888 and includes descriptions of each entry and notes on later editions Francis Sitwell has written an extensive introduction in which he provides a detailed guide to the organization and contents of the bibliography He also evaluates special geography as a genre which contributed to scholarly discourse from the sixteenth to the nineteenth centuries In addition he examines the genre as a whole and discusses its relation to the evolving world of ideas during the same time period The result of several years of data gathering this book will be a valuable research tool for anyone seeking to examine aspects of the development of the field of geography in the years before it was defined as a distinct academic discipline It will also be useful to those whose research focuses on the acquisition and transmission of geographical knowledge prior to the twentieth century in particular on the place of geography in educational curricula **Special**

Warfare, 2015 **Handbook of Research on Special Economic Zones as Regional Development Enablers**

Figueiredo, Paulo Guilherme, Leandro, Francisco José, Li, Yichao, 2021-10-15 Special economic zones SEZs are important doorways for countries to attract foreign investment and promote trade A strong correlation between the creation of SEZs and economic development indicators has also been identified in previous studies at the municipal level in China Thus the fundamental question that needs to be explored is to what extent SEZs can play the role of development enablers in different regions development states and institutional settings The Handbook of Research on Special Economic Zones as Regional Development Enablers discusses the diverse and international track records in the implementation of SEZs the interplay of SEZ models and local institutional infrastructure and stakeholders and the SEZ models that can best fit certain development states and or settings Covering topics such as the Belt and Road Initiative local and national economies and regional integration this book is essential for government officials development officers scholars students researchers entrepreneurs public decision makers aid agencies company executives investors and academicians *Understanding the Boundary between Disability Studies and Special Education through Consilience, Self-Study, and Radical Love* David I.

Hernández-Saca, Holly Pearson, Catherine Kramarczuk Voulgarides, 2022-12-13 In *Understanding the Boundary between Disability Studies and Special Education through Consilience Self Study and Radical Love* the authors explore what it means to engage in boundary work at the intersection of traditional special education systems and critical disability studies in

education The book consists of fifteen groundbreaking accounts that challenge dominant medicalized discourses about what it means to exist within and around special education systems that create space for new conceptions of what it means to teach lead learn and exist within a conciliatory space driven by radical love and disability justice principles The book pushes readers to consider how their own personal professional and programmatic future transformational actions can be driven by disruption and the desire for freedom from the hegemony of traditional special education and White and Ability supremacy

The Political Economy of Special Economic Zones Lotta Moberg, 2017-03-16 Special Economic Zones SEZs have become a popular development policy throughout the world over the last half a century These zones form designated areas where governments offer businesses lower taxes tariffs and often lighter regulations Generally SEZs aim to attract investments and raise a country's export and employment rates but although success stories are often cited there are numerous failed projects that have instead become burdens for their host countries This book examines SEZs from a political economy perspective both to dissect the incentives of governments zone developers and exporters and to uncover both the hidden costs and untapped potential of zone policies Costs include misallocated resources the encouragement of rent seeking and distraction of policy makers from more effective reforms However the zones also have several unappreciated benefits They can change the politics of a country by generating a transition from a system of rent seeking to one of liberalized open markets In revealing the hidden promise of SEZs this book shows how the SEZ model of development can succeed in the future Applying frameworks from various schools of political economy this volume places SEZs in the context of their mixed past and promising future It is essential reading for anyone with an interest in international economics development economics and political economy including practitioners and consultants of SEZ policies *A special relationship?* Simon Tate, 2024-06-04 This book addresses the special relationship from the perspective of post Second World War British governments It asks how they have perceived the special relationship and performed a foreign policy role within it This enables the book to argue that Britain's foreign policy challenges the dominant idea that its power has been waning and that it sees itself as the junior partner to the hegemonic US The book also shows how at moments of international crisis successive British governments have attempted to re play the same foreign policy role within the special relationship By setting contemporary foreign policy into its historical context it provides fresh insights into why Tony Blair's government felt it must participate in the Iraq War and questions anew why this decision was flawed The book concludes that these failings are likely to be re played and demonstrates why the special relationship's role in British foreign policy must be urgently re thought

Special Economic Zones in India Amitendu Palit, Subhomoy Bhattacharjee, 2008-07-01 Special Economic Zones SEZs are turning out to be one of the stiffest challenges for India's economic policy reforms Since the announcement of SEZ rules on 10 February 2006 these zones have aroused

unprecedented controversy The emotionally charged debate on SEZs has often produced inflexible positions on either side The unusually strong public reaction has also forced policymakers to revisit several aspects of the policy in recent months Why are SEZs so controversial Will they really exacerbate income inequality endanger food security and worsen regional imbalance Or will they help Indian industry in taking its final leap onto the global arena Only time will provide the answers As the first book on India's SEZs this volume examines different popular perceptions both good and bad surrounding these zones Apart from the international evidence and the Indian story the book looks closely at critical issues like financial viability land requirements extant rules and the political economy of SEZs Admitting that the last word on the subject is far from being spoken the book contends that the SEZ saga will be a test of strength for the country's social and political consensus on its economic policies and future reforms Introduced by eminent economist Bibek Debroy this book is a must read

Germany and the United States, a "special Relationship?" Hans Wilhelm Gatzke, 1980 A discerning statement about Germany and other nations this book reevaluates for the general reader and the historian the impact of rapid industrialization the origins of the world wars the question of war guilt the decade of Weimar democracy and the rise and fall of Hitler Gatzke looks anew at the economic miracle in West Germany and the consequences of making prosperity the cornerstone of a new republic

ENDING DISCRIMINATION IN SPECIAL EDUCATION Herbert Grossman, 2002-01-01 In this new edition the author goes into more detail about the solutions to the problems identified in the book The author a clinical psychologist and special educator points out the enormous disparities between the school experiences and educational outcomes for poor non European American immigrant rural and limited English proficient students with disabilities and their European American middle and upper class peers He also discusses the impacts of race and class prejudice and teacher expectations on the educational outcomes of students from impoverished and minority backgrounds via international comparisons and several case studies that illustrate the manner in which educational placement and support systems affect student outcomes Grossman challenges all special educators to take the bold steps necessary to end the

inequities experienced by low income and minority students in special education The author makes three strong contentions The first is that some students who do not need special education are inappropriately placed whereas others may be overlooked Second he asserts that special education strategies are not equally effective across socioeconomic status English language proficiency and ethnicity Finally he calls into question many of the professional practices of teachers psychologists administrators and professors who serve exceptional populations The author provides many personal accounts of events and experiences that capture the essence of what he speaks of in this book The content of this book is information to which all educators working with ethnically culturally and linguistically diverse children should have access It is informative and presented in a no nonsense fashion The reader learns a great deal about practices that do indeed impede the academic achievement and school success of students with special needs from minority and traditionally underrepresented groups The text can be used as supplemental reading in pre service courses for general or special education It is easy to read and cites many examples to reduce any possibility of misinterpretation Teacher educators will find it especially useful as a tool to generate discussion on the difficult and threatening topics and issues associated with discrimination in public education as a whole and special education in particular It will be of interest to special educators and administrators at all levels World Guide to Special Libraries Marlies Janson, Helmut Opitz, 2011-12-22 The World Guide to Special Libraries lists about 35 000 libraries world wide categorized by more than 800 key words including libraries of departments institutes hospitals schools companies administrative bodies foundations associations and religious communities It provides complete details of the libraries and their holdings and alphabetical indexes of subjects and institutions
