Spectral Analysis Francis Castanié, 2013-03-01 This book deals with these parametric methods first discussing those based on time series models Capon's method and its variants and then estimators based on the notions of sub spaces However the book also deals with the traditional analog methods now called non parametric methods which are still the most widely used in practical spectral analysis

Analysis of NMR Spectra R. A. Hoffman, S. Forsen, B. Gestblom, 2012-12-06 Nuclear magnetic resonance spectroscopy which has evolved only within the last 20 years has become one of the very important tools in chemistry and physics The literature on its theory and application has grown immensely and a comprehensive and adequate treatment of all branches by one author or even by several becomes increasingly difficult This series is planned to present articles written by experts working in various fields of nuclear magnetic resonance spectroscopy and will contain review articles as well as progress reports and original work Its main aim however is to fill a gap existing in literature by publishing articles written by specialists which take the reader from the introductory stage to the latest development in the field The editors are grateful to the authors for the time and effort spent in writing the articles and for their invaluable cooperation The Editors
