Duffy, 2025-08-19 In the five previous editions of

Advanced Engineering Mathematics with MATLAB the author presented a text firmly grounded in mathematics that engineers and scientists must understand and know how to use Tapping into decades of teaching at the US Navy Academy and the US Military Academy and serving for twenty five years at NASA Goddard Space Flight he combines teaching and practical experience that is rare among authors of advanced engineering mathematics books This edition continues to refine a smaller easier to read and useful version of this classic textbook While competing textbooks continue to grow the book presents a slimmer more practical option to align with the expectations of today's students The new edition of the author's classic textbook continues on a path to creating the best possible learning resource for instructors and students alike Through extensive class testing over five previous editions including the author's current course at the US Naval Academy the book has been steadily improved The primary mission of this edition is to dramatically increase the quality and quantity of examples and problems especially in the chapters on differential equations and Laplace transforms The chapters on differential equations linear algebra Fourier series and Laplace transforms have seen the greatest changes Of course this edition continues to offer a wealth of examples and applications from scientific and engineering literature a highlight of previous editions MATLAB remains central to the presentation and is employed to reinforce the concepts that are taught Worked solutions are given in the back of the book An Instructor's Solutions Manual is also available **Books In Print**

*Engineering Mathematics with MATLAB, Second Edition* Dean G. Duffy, 2003-03-28 Resoundingly popular in its first edition Dean Duffy's *Advanced Engineering Mathematics* has been updated expanded and now more than ever provides the solid mathematics background required throughout the engineering disciplines Melding the author's expertise as a practitioner and his years of teaching engineering mathematics this text stands clearly apart from the many others available Relevant insightful examples follow nearly every concept introduced and demonstrate its practical application This edition includes two new chapters on differential equations another on Hilbert transforms and many new examples problems and projects that help build problem solving skills Most importantly the book now incorporates the use of MATLAB throughout the presentation to reinforce the concepts presented MATLAB code is included so readers can take an analytic result fully explore it graphically and gain valuable experience with this industry standard software

*Advanced Data Acquisition and Intelligent Data Processing* Vladimir Haasz, Kurosh Madani, 2022-09-01 DAQ and data processing is a basic part of all automated production systems diagnostic systems watching over quality of production energy distribution transport control or in various other areas Demands on the speed accuracy and reliability increase in general It is possible to achieve not only using superior but also more expensive hardware but also applying advanced data acquisition and intelligent data processing It deals e.g optimal data fusion of a number of sensors new stochastic methods for accuracy increasing new algorithms for acceleration of data processing etc These are the grounds for publishing this book *Advanced Data Acquisition and Intelligent Data Processing* offers 10 up to date examples of different applications of advanced data acquisition and intelligent data processing used in monitoring measuring and diagnostics systems The book arose based on the most interesting papers from this area published at IDAACS 2013 conference However the individual chapters include not only designed solution in wider context but also relevant theoretical parts achieved results and possible future ways Technical topics discussed in this book include advanced methods of data acquisition in application that are not routine measured data fusion using up to date advanced data processing nonlinear dynamical systems identification multidimensional image processing *Advanced Data Acquisition and Intelligent Data Processing* is ideal for personnel of firms deals with advanced instrumentation energy consumption monitoring environment monitoring non destructive diagnostics robotics etc as well as academic staff and postgraduate students in electrical control and computer engineering
