 and direct evidence based treatment programs including the use of technology are covered in detail The text is a highly
 practical book designed specifically for practicing clinicians instructors and students in both audiology and speech language

pathology It contains a comprehensive review of APD and is also an excellent resource for parents teachers and other professionals wishing to learn more about APD for themselves their child and their practice New to the Fourth Edition New chapters on the effects of COVID 19 RSV PANDAS autoimmune disorders and other medical issues on APD evaluating APD through telepractice the collaboration of the audiologist and speech language pathologist in evaluating auditory processing skills and other listening problems treatment interventions for deficit specific processing disorders and other auditory skills differentiation between auditory processing and listening disorders an integrative model for auditory linguistic and cognitive processes listening difficulties in the classroom and how to differentiate them from APD identification and treatment of dichotic deficits Updated chapter on auditory neuropathy Updated chapter on current neuroscience on the relationship between auditory processing and literacy Description of new digital module technology for sound enhancement Updated apps for interventions for APD Key Features Contributions from the field s most recognized experts such as Martha S Burns Sharon Cameron Harvey Dillon Jeanane M Ferre James W Hall III Jack Katz Angela Loucks Alexander Larry Medwetsky Deborah Moncrieff and Gary Rance Case studies illustrating the pansensory nature of an APD and the importance of multidisciplinary collaboration An integrative model for understanding APD utilizing research from cognitive neuroscience neurophysiology neurobiology mathematics and neuroanatomy A model of speech understanding to differentiate APD from non auditory deficits and listening problems *Cognition and Acquired Language Disorders - E-Book* Richard K. Peach, Lewis P. Shapiro, 2011-12-10 This new graduate level textbook *Cognition and Acquired Language Disorders* An Information Processing Approach addresses the cognitive aspects of language and communication It assembles the most recent information on this topic addressing normal cognitive processing for language in adults the cognitive impairments underlying language disorders arising from a variety of neurologic conditions and current assessment and treatment strategies for the management of these disorders The text is organized using an information processing approach to acquired language disorders and thus can be set apart from texts that rely upon a more traditional syndrome based approach e g stroke dementia and traumatic brain injury This approach facilitates the description and treatment of acquired language disorders across many neurologic groups when particular cognitive deficits are identified Other useful features of the text include assessment and treatment protocols that are based on current evidence These protocols provide students and clinicians a ready clinical resource for managing language disorders due to deficits in attention memory linguistic operations and executive functions Unique process oriented approach organizes content by cognitive processes instead of by syndromes so you can apply the information and treatment approaches to any one of many neurologic groups with the same cognitive deficit Cognitive domains are described as they relate to communication rather than separated as they are in many other publications where they are treated as independent behaviors A separate section on normal processing includes five chapters providing a strong foundation for understanding the factors that contribute to disordered communication and its

management The evidence based approach promotes best practices for the most effective management of patients with cognitive communication disorders Coverage of the cognitive aspects of communication helps you meet the standards for certification in speech language pathology A strong author team includes two lead authors who are well known and highly respected in the academic community along with expert contributors ensuring a comprehensive advanced clinical text reference
