**ADVANCES IN PHYSICAL EDUCATION AND SPORTS SCIENCE** Prof. Rajesh Kumar , Prof. L.B.Laxmikanth Rathod , Dr. C. Veerender and Dr. G. Akhila, 2022-09-29 Weight training refers to any type of training that involves the body moving in same direction against a force that resists that movement and is supplied by some type of weight including free weights and weight machines 8 Weight training using near one repetition 1RM weight at low velocity has been found to improve the muscle s ability to generate force but the increase in strength may not be effective at velocities that stimulate the speed of sport performance 3 Muscular strength is much different from muscular endurance Strength is a measure of how much force your muscles can exert while endurance is the measure of how many times your muscles can repeat a specific exertion of force Unlike muscular endurance which is controlled by slow twitch fibers strength is determined by fast twitch fibers which focus more on quick bursts of energy rather than long drawn out ones

**MASTERING MOVEMENT: A NEW APPROACH TO COACHING AND PRACTICING SPORTS SKILLS** Antony Zef, 2023 It was about five years ago walking around my local park on a beautiful Saturday morning when I suddenly realized something was dreadfully wrong On the soccer fields kids from a local club were waiting in lines to dribble a ball around a set of cones On another field players from a nearby high school football team were waiting in line to run through a set of tires On the baseball diamond batters were hitting balls off tees On the tennis court the instructor was tossing the ball underhand to a player attempting to repeat the same forehand stroke over and over into an empty court

Soccer football baseball and tennis are incredibly exciting dynamic activities defined by their interpersonal actions attacker vs defender pitcher vs hitter server vs receiver It seems like almost every week we see a highlight of an athlete from one of these sports doing something new and unexpected So why then do we practice them in such a static isolated and choreographed manner If an alien from another planet came and watched would they think the goal of sports here on earth was to defeat inanimate pieces of rubber Why do we insist on teaching movement skills this way From golf lessons to soccer practice to learning to do pottery the dominant view has been that we become skillful by trying to repeat the one correct technique given to us by a coach or an instructor over and over until we get it right In baseball tennis and golf we learn THE way to swing In soccer and basketball we learn THE correct way to dribble a ball In pottery we learn THE way to position our hands We reduce these creative interactive dynamic activities down to dull isolated fundamentals so that they can be drilled and mastered For a long time we have assumed that decomposition and repetition rule the day if you want to be an elite performer In this book I want to introduce you to a revolution in the way we think about learning to move and act in the world A radical change
