Wesely,2024-06-11 This book tells the stories of 15 world language WL teachers in the United States at elementary and secondary levels through rich descriptions of their lived worlds and experiences In depth interviews extensive observations learner interviews and document and environment analysis illustrate in detail how teacher beliefs relate to their practices and are mediated and moderated by their learners institutional demands equity and access to WL education and other factors The chapters provide a deep and robust explanation of individual teachers teaching lives and a cross contextual comparison of their experiences shining a light on the realities and demands of modern US schools Grounded in the research literature on language teacher beliefs and cognition this book takes the stance that all teaching is situated and contextual and that addressing teachers methods practices and knowledges in ways that are divorced from their setting and environment has serious limitations It offers fascinating insights for researchers language educators and pre and in service teachers with reflection questions at the end of each chapter to guide readers in drawing connections with their own practice interests and contexts **The Typology of Physical Qualities** Ekaterina Rakhilina,Tatiana Reznikova,Daria Ryzhova,2022-05-15 What is it like This is often the first question we ask about any object and it is typically answered with adjectives old smooth pointed narrow etc Characteristics of things around us is a fundamental aspect of how we conceptualize the physical world regardless of when or where we live and regardless of our language Despite this the vocabulary of physical qualities has received comparatively little attention in lexical typology most research so far has focused on verbs and the actions they express This volume presents a lexico typological study of several domains of physical qualities sharp blunt wet empty full old as well as dimensions temperature and surface texture It discusses several

theoretical issues including intragenetic language sampling the possibility of signed vs spoken language comparison at the lexicon level and the potential of applying computational models of distributional semantics to lexical typology The book will be of interest to linguists with a focus on typology general and lexical semantics to lexicographers and to language students and teachers **The Stenographer and Phonographic World** ,1917 **Spanish Grammar Made Simple: An Easy**
