The Consuming Instinct Gad Saad, 2011-06-21 For anyone interested in the biological basis of human behavior or simply in what makes consumers tick marketing professionals advertisers psychology mavens and consumers themselves this is a fascinating read What do all successful fast food restaurants have in common Why are women more likely to become compulsive shoppers and men more likely to become addicted to pornography How does the fashion industry play on our innate need to belong Why do men s testosterone levels

rise when they drive a Ferrari or a Porsche The answer to all of these intriguing questions is the consuming instinct the underlying evolutionary basis for most of our consumer behavior In this highly informative and entertaining book the founder of the vibrant new field of evolutionary consumption illuminates the relevance of our biological heritage to our daily lives as consumers While culture is important the author shows that innate evolutionary forces deeply influence the foods we eat the gifts we offer the cosmetics and clothing styles we choose to make ourselves more attractive to potential mates and even the cultural products that stimulate our imaginations such as art music and religion This book demonstrates that most acts of consumption can be mapped onto four key Darwinian drives namely survival we prefer foods high in calories reproduction we use products as sexual signals kin selection we naturally exchange gifts with family members and reciprocal altruism we enjoy offering gifts to close friends The author further highlights the analogous behaviors that exist between human consumers and a wide range of animals Straight Science? Homosexuality, Evolution and Adaptation Jim

McKnight,2003-09-02 A genetic basis for homosexuality has been all but proved yet Darwinism the most widely accepted evolutionary theory emphasises successful reproduction How do we explain a lifetime preference for non reproductive sex Whilst social constructionism offers explanations in terms of social learning and cultural preferences the body of evidence for a genetic predisposition to homosexuality grows Social learning argues that homosexual sex is merely misdirected and therefore futile but far from dying out it continues through the ages and is found in different cultures What if there was an evolutionary advantage to homosexuality Straight Science Homosexuality Evolution and Adaptation dares to ask such questions **The Pall Mall Magazine** ,1913
