Robin Higham presents a unique comprehensive study of BOAC from the early jet travel of the de Havilland Comet and the Vickers VC10 to the dawn of supersonic passenger aviation Highly illustrated and meticulously researched using previously unseen sources this book will be essential reading for all aviation enthusiasts and anyone interested in the history of modern Britain [Air University Periodical Index](#) ,1962 *Two Roads to War* Robin Higham,2012-06-15 Noted aviation historian Robin Higham has written this comparative study of the evolution of the French and British air arms from 1918 to 1940 to determine why the Arm e de l Air was defeated in June 1940 but the Royal Air Force was able to win the battle over Britain in September After analyzing the structure men and mat riel of the air arms and the government and economic infrastructure of both countries he concludes that the French force was dominated by the Arm e de Terre had no suitably powerful aero engines and suffered from the chaos of French politics In contrast the independent RAF evolved into a sophisticated scientifically based force supported by consistent government practices Higham s thorough examination however finds the British not without error **Journal of the Royal Aeronautical Society** ,1967 [Lady Almina and the Real Downton Abbey](#) Countess Of Carnarvon,2011-09-29 Bright breezy and unpretentious Guardian A loving and faithful portrait of Almina and her world Countryfile magazine The story of the real Downton Abbey told by Lady Fiona Carnarvon chatelaine of Highclere Castle where the phenomentally successful TV series was filmed Lady Fiona Carnarvon became the chatelaine of Highclere Castle the setting of the hit series Downton Abbey eight years ago In that time she s become fascinated by the rich history of Highclere and by the extraordinary people who lived there over the centuries One person particularly captured Fiona s imagination Lady Almina the 5th Countess of Carnarvon Almina was the illegitimate daughter of banking tycoon Alfred de Rothschild She was his only daughter and he doted on her She married the 5th Earl of Carnarvon at 19 with an enormous dowry At first life at Highclere was a dizzying mix of sumptuous banquets for 500 and even the occasional royal visitor Almina oversaw 80 members of staff many of whom came from families who had worked at Highclere for generations But when the First World War broke out life at Highclere changed forever History intervened and Almina and the staff of Highclere were thrown into one of the most turbulent times of the last century Almina was forced to draw on her deepest reserves of courage in order to ensure her family the staff and the castle survived This is the remarkable story of a lost time But Highclere remains and in this book Fiona weaves Almina s journey and those of her family into the heritage and history of one of England s most exquisite Victorian castles *The Magic of a Name: The Rolls-Royce Story, Part 2* Peter Pugh,2015-04-02 The Magic of a Name tells the story of the first 40 years of Britain s most prestigious manufacturer Rolls Royce Beginning with the historic meeting in 1904 of Henry Royce and the Honourable C S Rolls and the birth in 1906 of the legendary Silver Ghost Peter Pugh tells a story of genius skill hard work and dedication which gave the world cars and aero engines unrivalled in their excellence In 1915 100 years ago the pair produced their first aero engine the Eagle which along with the Hawk Falcon and Condor proved themselves in battle in the First World War In the Second the totemic Merlin was

installed in the Spitfire and built in a race against time in 1940 to help win the Battle of Britain With unrivalled access to the company's archives Peter Pugh's history is a unique portrait of both an iconic name and of British industry at its best **A History of the Royal Navy: World War I** Mike Farquharson-Roberts, 2014-07-08 World War I is one of the iconic conflicts of the modern era For many years the war at sea has been largely overlooked yet at the outbreak of that war the British Government had expected and intended its military contribution to be largely naval This was a war of ideologies fought by and for empires Britain was not defending simply an island it was defending a far flung empire Without the navy such an undertaking would have been impossible In many respects the Royal Navy fought along the longest front of any fighting force of the Great War and it acted as the leader of a large alliance of navies The Royal Navy fought in the North and South Atlantic in the North and South Pacific its ships traversed the globe from Australia to England and its presence extended the war to every continent except Antarctica Because of the Royal Navy Britain could finance and resource not only its own war effort but that of its allies Following the naval arms race in the early 20th century both Britain and Germany were equipped with the latest naval technology including revolutionary new vessels such as dreadnoughts and diesel powered submarines Although the Royal Navy's operations in World War I were global a significant proportion of the fleet's strength was concentrated in the Grand Fleet which confronted the German High Seas Fleet across the North Sea At the Battle of Jutland in 1916 the Royal Navy under the command of Admiral Jellicoe fought an iconic if inconclusive battle for control of shipping routes The navy might not have been able to win the war but as Winston Churchill put it she could lose it in an afternoon The Royal Navy was British power and prestige 43 244 British navy personnel would lose their lives fighting on the seas in World War I This book tells their story and places the Royal Navy back at the heart of the British war effort showing that without the naval dimension the First World War would not have been a truly global conflict *Aircraft* David Pascoe, 2004-09-03 In his celebrated manifesto *Aircraft* 1935 the architect Le Corbusier presented more than 100 photographs celebrating airplanes either in imperious flight or elegantly at rest Dwelling on the artfully abstracted shapes of noses wings and tails he declared Ponder a moment on the truth of these objects Clearness of function In *Aircraft* David Pascoe follows this lead and offers a startling new account of the form of the airplane an object that in the course of a hundred years has developed from a flimsy contraption of wood wire and canvas into a machine compounded of exotic materials whose wings can touch the edges of space Tracing the airplane through the twentieth century he considers the subject from a number of perspectives as an inspiration for artists architects and politicians as a miracle of engineering as a product of industrialized culture as a device of military ambition and finally in its clearness of function as an instance of sublime technology Profusely illustrated and authoritatively written *Aircraft* offers not just a fresh account of aeronautical design documenting in particular the forms of earlier flying machines and the dependence of later projects upon them but also provides a cultural history of an object whose very shape contains the dreams and nightmares of the modern age **The Journal of the Royal Aeronautical**
