Sleep-Wake Cycle Across Development Piero Salzarulo, Gianluca Ficca, 2002-05-29 Sleep and wakefulness undergo important changes with age Awakening a crucial event in the sleep wake rhythm is a transition implying complex physiological mechanisms Its involvement in sleep disturbances is also well known This collective volume is the first attempt to systematically approach awakening across development A methodological section considers criteria to define awakening in a developmental perspective Theoretical considerations on development of wakefulness and on its relation to consciousness are included and provide a vigorous impulse to go beyond present criteria and classifications Age changes are the core of studies on development a section of the book examines old and new data from preterm to infants up to children underscoring the main turning points along this developmental path As for other aspects of development awakening and the sleep wake cycle are also influenced by external factors both physical and human Several contributions deal with this topic in particular focusing on the parent infant interaction and the influences of culture Clinical contexts offer an opportunity to show both

quantitative and qualitative changes of awakening and arousals in different pathological conditions Either partial changes of one physiological variable or global and massive changes can be observed Series B **The Art of Conscious Parenting**

Jeffrey L. Fine, 2009-09-28 A new approach to creating rediscovering and renewing the intimate bonds between parents and children Explains the importance of bonding with your child in utero and the physical and mental preparation needed even before conception Shows how green parenting breast feeding contact with nature and low tech creativity can enhance your child's life The Art of Conscious Parenting won the 2010 Gold Nautilus Award for the best Parenting Childcare book The Nautilus Awards recognize books that promote spiritual growth conscious living and positive social change while at the same time stimulating the imagination and offer the reader new possibilities for a better life and a better world Our first days and months of life are critical in forming the attitudes we bring into adulthood and in structuring the very roots of our personality Simple bonding techniques long forgotten in our modern world but stemming from the age old customs of indigenous peoples are at the core of a new model of conscious parenting that can produce happy and well adjusted children These practices also help parents experience an increased joy and intimacy both with their child and with each other Based on obstetric and psychological evidence Jeffrey and Dalit Fine reveal how bonding begins in utero and that the physical and mental preparation of both the father and mother even before conception sets the tone for the future well being of the child They show how sustained physical contact and simple ways of consciously interacting with your infant eye contact with the newborn baby wearing instead of stroller use and co sleeping have an observable positive effect They also show that the green parenting practices of breast feeding contact with nature and simple low tech creative play not only provide a more hands on and intimate approach to parenting but also are more economical and environmentally sustainable From in utero bonding through the challenges and joys of consciously interacting with your growing child this book will help parents rediscover and apply the natural art of conscious parenting **Roger's Textbook of Pediatric Intensive Care** Donald H.
