Government,2012 Augmentative and Alternative Communication Filip Loncke,2020-10-09 Augmentative and Alternative Communication Models and Applications Second Edition describes augmentative and alternative communication AAC comprehensively and offers a framework for understanding how AAC intervention can be used in the process of communication This textbook is intended to serve as the primary text for graduate level courses in augmentative and alternative communication in speech language pathology programs It also serves as an essential resource for practicing clinicians AAC is used by an ever growing group of individuals of all ages each with their own personal and communication needs The book presents the various AAC interventions and teaches the prospective clinician which intervention may be effective depending on the needs condition and prognosis of the client The text details how communication is shaped by internal and external factors and how communication affects social functioning New to the Second Edition A revised introductory chapter reflecting recent changes in the field Thoroughly updated chapters on technology vocabulary and assessment Reorganization of the chapters for a more natural flow of information New and revised artwork throughout including images tables and charts New and expanded case studies covering different types of communicators their needs and AAC solutions Expanded coverage on the following topics The debate on core vocabulary and discussion of best practices Perspectives and views from AAC users Ethics in AAC service delivery Research issues *Literacy and Augmentative and Alternative Communication* Martine Smith,2021-11-15 The new demands of this computer and technology age have focused international attention on literacy levels on literacy development and literacy disorders Governments have launched programs to reduce literacy difficulties and support functional literacy for all In this context the needs of individuals with severe speech and physical impairments may seem relatively small and even unimportant However for this group of individuals in particular unlocking the literacy code opens up tremendous opportunities minimizing the disabling effects of their underlying speech and motor impairments and supporting participation in society Ironically however for a group for whom literacy is such an important achievement current studies suggest that achieving functional literacy skills is particularly challenging In order to read individuals with severe speech impairments must access a set of written symbols and decode them to abstract meaning just as anyone else must do They must convert underlying messages into an alternative external symbol format in order to write In order to become expert in both of these activities they must learn at least a certain core of knowledge about how the symbols and messages relate to each other Just as there are many ways to skin a chicken there are many possible ways to achieve mastery of reading and writing Although the essence of the task may remain the same for individuals with congenital speech impairments they may process the task or develop task mastery in ways that are quite different from speaking children who have no additional physical impairments Literacy and Augmentative and Alternative Communication focuses on individuals with combined physical and communication impairments who rely at least some of the time on aided communication It investigates the range of research and application issues relating to AAC and

literacy primarily reading and writing skills from the emergent literacy stage up through adulthood use of reading for various vocational and leisure purposes It provides a balanced view of both the whole language as well as the more analytic approaches to reading instruction necessary for the development of reading skills
