Special Kids For Special Treatment:

Special Kids for Special Treatment? Helen Phtiaka, 2018-09-03 First published in 1997 This book compares and contrasts the experiences of deviant pupils in a mainstream school with that of those in a special unit for pupils with behavioural problems The author's aims are to i evaluate the differences between the behaviour of deviant boys and girls within the mainstream education system with those without and ii justify the criteria for transferring deviant pupils to special units Her research shows that there is no uniformity in the deviant behaviour of pupils in either situation In fact there are more similarities in the behaviour of pupils across the dividing line than pupils in the same institution Such findings raise questions about the apparent arbitrary nature of some transferral decisions and in the longer term the whole logic of separate schooling for pupils who are considered by some to be a problem At a time when market forces and competition have distracted the schools attention away from the needs of the individual pupil this book stresses the need for changes at all levels which will make school relevant to the lives of all pupils

they would try to make Mike's dream come true. But first they would have to work through the fear, anger, and distrust that accompanied this boy who had lived his whole life with the label severely emotionally disturbed. For the biggest obstacle to Mike's happiness was Mike himself, who gave the Ministers every reason to give up but one: the power of love. When Richard and Sue Minter decided to open their home and their hearts to a foster child, they couldn't imagine the frustrations and joys, the breakthroughs and setbacks, not to mention the emotional toll that awaited them. Here is the remarkable true story of how their lives changed forever with their decision to answer an abandoned child's wish for **THE THINGS I WANT MOST**.

Alienation From Schooling (1986) Peter Fensham, 2018-01-17 Originally published in 1986, this book presents three full case studies of secondary school communities in Australia: one city school in a working class area, one community school serving a wide more rural area, and a school with an academic tradition in the suburbs of a large city. The material is drawn together to discuss and describe the issues revealed by the studies; these include discipline, boredom, staff-student relations, and the relevance of school work to the outside world. The book includes interviews with both students and teachers, recording the reactions of students to the way they are being taught and their views on whether it is worth working hard at school when there is no certainty of a job at the end of it. The philosophy of the teachers emerges in the interviews, as do their views on the prospect of changing students' attitudes from those acquired at home and on the need for vocational rather than academic courses. What also comes out in the interviews is their realistic attitudes to their students' future job prospects and their views on alternative courses which could prepare the pupils for life rather than for a specific job. The book also includes an account of how the case studies were undertaken and reported. The methodological chapters set out some of the dilemmas and the possibilities in the study of such complex human situations.
