The Spiralling of the Securitisation of Migration in the European Union Valeria Bello, Sarah Léonard, 2023-03-31 This book investigates how migration has been transformed into a security threat in Europe It argues that this process has taken place through a self fulfilling spiralling process which involves different actors and their specific narratives practices and policies The book examines how situations stemming from the so called migration crisis in the European Union EU have been dealt with by governments and non governmental organisations It also considers how actors treating migration as an ordinary phenomenon rather than a threat and sharing inclusive narratives can create the conditions for decelerating and eventually stopping securitisation processes Some chapters examine the spiralling of the securitisation of migration in depth by analysing increases in securitisation as well as cases characterised by resistance Others focus on examining the consequences of socially constructing migration as a crisis for the EU s relations with third countries In sum this book shows that there is a wide range of motives for which states and societies would benefit from a change in migration politics and

move from the current management of a crisis to a more positive governance of human mobility It will be of interest to researchers and advanced students of sociology politics international relations social and cultural anthropology human geography and social work This book was originally published as a special issue of the Journal of Ethnic and Migration Studies

Security in 21st Century Europe Andrew Cottey, 2025-05-01 The nature of security in Europe has been transformed in recent years Security in 21st Century Europe argues that the defining feature of contemporary European security is the existence of a security community underpinned by the twin institutions of the EU and NATO but that today the European security community NATO and the EU face a growing array of external challenges and their ability to respond to those challenges is increasingly being called into question Offering a systematic assessment of security in contemporary Europe this third edition examines the changing character of European security and assesses the extent of the threats posed by recent challenges as well as the policy dilemmas involved in responding to these challenges It explores Europe's engagement with core thematic issues in European security including military intervention nuclear weapons terrorism and non military security Providing both a substantive contribution to academic thinking on European security and a overview of debates on contemporary European security this new edition offers 3 new chapters on migration climate change and cybersecurity Coverage of all recent major developments related to European security including the Syrian civil war and the regional destabilization arising from it Russia Ukraine crisis the rise of populism the migration crisis the acceleration of China's rise Security in 21st Century Europe combines theory and detailed empirical analysis exploring both how different theoretical perspectives can help us think about European security and concrete empirical developments in European security policies and institutions This text is the perfect companion for advanced undergraduate and Master's level courses on European security whether within courses in Security studies

European studies or International Relations Mortgaged Backed Securities Harold Keller, 2006-10-27 Inhaltsangabe
Summary In order to ensure that the mortgage market remains buoyant lenders require constant access to sufficient funds
Traditionally mortgage lenders rely on retail deposits mortgage covered bonds or dedicated savings to provide this source of
funding However those providers who do not have the luxury of an established and reliable retail deposit base or high credit
rating necessary for cheap money market credit are forced to think of alternatives Securitization of originated mortgage
loans can provide the answer Financial institutions that originate loans are able to turn their loans into marketable securities
through a process known as securitization The originators of the loans are commonly referred to as the issuers of asset
backed securities ABS ABS constitute a relatively new but fast growing segment of the debt markets in Europe The
combination of a number of legal and economic factors has provided a favorable climate for securitization in Europe
especially in the United Kingdom UK and in its country of origin the United States US In turn these countries have
experienced considerable growth in securitization volumes over the past years In contrast due to a weak economy and an
unfavorable legal tax and regulatory environment the German securitization market was not able to develop in much the
same way However the German economy has started to recover in the current year and is forecasted to continue growing in
2007 This economic growth will in turn drive the domestic mortgage demand In addition based on the state and structure of
the German mortgage market it is becoming increasingly attractive for foreign investors Thus both the economic recovery
and an increased mortgage demand will drive the funding requirements of German banks Moreover the significance of
securitization as an alternative refinancing instrument for residential mortgages is likely to grow not least because the
elimination of the legal tax and regulatory hurdles has enhanced the attractiveness of true sale securitization in Germany The
title of the thesis is called Mortgage Backed Securities A New Source of Financing Retail Mortgages for German Banks As
raising finance is elementary to the growth and profitability of banks the hypothesis of the thesis inevitably boils down to the
question whether the application of mortgage backed securities MBS increases the ability of German banks to raise finance
for *The Oxford Handbook of Banking* Allen N. Berger, Philip Molyneux, John O.S. Wilson, 2010 This handbook provides an
overview and analysis of state of the art research in banking written by researchers in the field It includes abstract theory
empirical analysis and practitioner and policy related material **Understanding Financial Risk Management** Angelo
Corelli, 2024-05-27 Financial risk management is a topic of primary importance in financial markets It is important to learn
how to measure and control risk how to be primed for the opportunity of compensative return and how to avoid useless
exposure *Benchmarking Muslim Well-Being in Europe* Irving Jackson, Pamela, Doerschler, Peter, 2012-07-11 This highly
topical book aims to undermine unsubstantiated myths by examining Muslim integration in Germany France the Netherlands
and the United Kingdom states which dominate the debate on minority integration and the practice of Muslim religious
traditions These nations have a range of alternative relationships between religion and the state as well as strategies for

coordinating individuals ethnic and state identities Using the European Parliament's benchmarking guidelines surveys and other non official data the authors find that in some areas Muslims are in fact more integrated than popularly assumed and suggest that instead of failing to integrate Muslims find their access to integration blocked in ways that reduce their life chances in the societies in which they are now permanent residents The book will have an impact on research and policy especially with the commencement of the EU wide integration benchmarking effort and will be an excellent resource for researchers academics and policy makers

Innovations in Securitisation Yearbook 2006 Jan Job de Vries Robbé,Paul A. U. Ali,2006-01-01 Despite fears that regulators around the world would act to curtail securitisation severely in the aftermath of the collapse of Enron WorldCom and Parmalat the securitisation industry has witnessed what can only be described as relentless innovation Securitisation remains one of the most important means for financial institutions to diversify their funding transfer credit risk and manage solvency requirements This volume the second in a series focusing on the latest innovations in the global securitisation industry provides advisers with detailed guidance on key structural and legal issues of innovative securitisations as well as describing the most recent developments in the accounting and risk capital treatment of securitisation transactions The contributors represent a wide range of expert participants in the design execution and regulation of securitisation transactions Among the critical features of contemporary securitisation covered are the following project finance CLOs securitisation of equity risk securitisation of commodity risk through commodity trigger swaps the convergence of structured credit and securitisation markets innovation in RMBS negative equity transactions innovation in CMBS A B structure new markets in Europe Japan and Islamic countries catastrophe risk securitisation effect of recent US bankruptcy legislation on synthetics microfinance loan securitisation in emerging markets public sector securitisation securitisable intellectual property application of accounting standards in a rapidly changing environment and updated analysis of Basel II The practical perspective of the contributions combined with the extensive use of case studies of key transactions should make this volume an invaluable resource for lawyers as well as legal and business academics interested in the very latest developments in the global securitisation markets

EU Labor Markets After Post-Enlargement Migration Martin Kahanec,Klaus F. Zimmermann,2009-10-10 Selected by Princeton University as Noteworthy Book in Industrial Relations and Labor Economics for 2010 Are immigrants from the new EU member states a threat to the Western welfare state Do they take jobs away from the natives And will the source countries suffer from severe brain drain or demographic instability In a timely and unprecedented contribution this book integrates what is known about post enlargement migration and its effects on EU labor markets Based on rigorous analysis and hard data it makes a convincing case that there is no evidence that the post enlargement labor migrants would on aggregate displace native workers or lower their wages or that they would be more dependent on welfare While brain drain may be a concern in the source countries the anticipated brain circulation between EU member states may in fact help to solve their demographic and economic problems

and improve the allocative efficiency in the EU The lesson is clear free migration is a solution rather than a foe for labor market woes and cash strapped social security systems in the EU Nonstate Actors in Intrastate Conflicts Dan Miodownik, Oren Barak, 2014 Through case studies of Afghanistan Lebanon Israel Palestine and Turkey this volume examines the manifold roles of external nonstate actors in influencing the outcome of hostilities within a state's borders
