**Interpretation in International Law** Andrea Bianchi, Daniel Peat, Matthew Windsor, 2015-02-26 International lawyers have long recognised the importance of interpretation to their academic discipline and professional practice As new insights on interpretation abound in other fields international law and international lawyers have largely remained wedded to a rule based approach focusing almost exclusively on the Vienna Convention on the Law of Treaties Such an approach neglects interpretation as a distinct and broader field of theoretical inquiry Interpretation in

International Law brings international legal scholars together to engage in sustained reflection on the theme of interpretation. The book is creatively structured around the metaphor of the game which captures and illuminates the constituent elements of an act of interpretation. The object of the game of interpretation is to persuade the audience that one's interpretation of the law is correct. The rules of play are known and complied with by the players even though much is left to their skills and strategies. There is also a meta discourse about the game of interpretation playing the game of game playing which involves consideration of the nature of the game its underlying stakes and who gets to decide by what rules one should play. Through a series of diverse contributions *Interpretation in International Law* reveals interpretation as an inescapable feature of all areas of international law. It will be of interest and utility to all international lawyers whose work touches upon theoretical or practical aspects of interpretation. *The Reality of Social Construction* Dave

Elder-Vass, 2012-04-23 Social construction is a central metaphor in contemporary social science yet it is used and understood in widely divergent and indeed conflicting ways by different thinkers. Most commonly it is seen as radically opposed to realist social theory. Dave Elder Vass argues that social scientists should be both realists and social constructionists and that coherent versions of these ways of thinking are entirely compatible with each other. This book seeks to transform prevailing understandings of the relationship between realism and constructionism. It offers a thorough ontological analysis of the phenomena of language discourse culture and knowledge and shows how this justifies a realist version of social constructionism. In doing so however it also develops an analysis of these phenomena that is significant in its own right.

*Truth, Force, and Knowledge in Language* Savas L. Tsohatzidis, 2020-08-24 This book collects twenty five of the author's essays each of which addresses a descriptive or a foundational issue that arises at the interface between linguistic semantics and pragmatics on the one hand and the philosophy of language on the other. Arranged into three interconnected parts I Matters of Meaning and Truth II Matters of Meaning and Force III Knowledge Matters the essays suggest that some key topics in the above mentioned fields have often been approached in ways that considerably underestimate their empirical or conceptual complexity and attempt to delineate perspectives from which and conditions under which an improved understanding of those topics could be sought. The book will be of interest to linguists working in semantics and pragmatics and to philosophers working in the philosophy of language and in epistemology. *The ^AOxford Handbook of Assertion*

Sanford C. Goldberg, 2020-03-02 The Oxford Handbook of Assertion explores philosophical themes pertaining to the speech act of assertion the nature of assertion assertion's place among the speech acts empirical issues in theories of assertion assertion's role in semantics and metasemantics the place of assertion in the epistemology of testimony and the social and ethical dimensions of assertion. *Institutional Change and Performativity* Noriaki Okamoto, 2024-07-06 This book analyzes

the recent development of accounting in Japan from an interdisciplinary perspective focusing specifically on how institutional reality is constructed. Integrating theoretical perspectives from institutional economics and performativity studies the book

creates a framework to systematically explain institutional changes and dynamics against a backdrop of increasing globalization and financialization The first part of the book connects Searlean theories of institutional reality and social ontology with studies in performativity particularly its linguistic aspects to show how collectively accepted social norms can performatively shape institutions The second section explores how these patterns can be uniquely traced in the recent history of Japan s financial accounting standards and institutions in particular how globalization financialization fair value accounting and a shareholder value primacy form of corporate governance have prevailed It also explores the establishment of the International Accounting Standards Board IASB and the increasing global convergence of accounting standards The book argues that multiple collectively accepted performative norms can be identified simultaneously in Japanese accounting as well as discussing how these social dynamisms are identified and dispersed linguistically such as by researchers and journalists This book will be of interest to those working in accounting and financial reporting as well as those working in social studies of finance economic sociology and institutional economics
