Phillips, 1991 Gerald M Phillips draws on his twenty five year five thousand client experience with the Pennsylvania State University Reticence Program to present a new theory of modification of inept communication behavior That experience has convinced Phillips that communication is arbitrary and rulebound rather than a process of inspiration He demonstrates that communication problems can be described as errors that can be detected and classified in order to fit a remediation pattern Regardless of the source of error the remedy is to train the individual to avoid or eliminate errors thus orderly procedure will result in competent performance Inept communicators must be made aware of the obligations and constraints imposed by deep structures that require us to achieve a degree of formal order in our language without which our discourse becomes incomprehensible **6th World Congress of Biomechanics (WCB 2010), 1 - 6 August 2010, Singapore** Chwee Teck Lim, James Goh Cho Hong, 2010-08-09 Biomechanics covers a wide field such as organ mechanics tissue mechanics cell mechanics to molecular mechanics At the 6th World Congress of Biomechanics WCB 2010 in Singapore authors presented the largest experimental studies technologies and equipment Special emphasis was placed on state of the art technology and medical applications This volume presents the Proceedings of the 6th WCB 2010 which was held in conjunction with 14th International Conference on Biomedical Engineering ICBME 5th Asia Pacific Conference on Biomechanics APBiomech The peer reviewed scientific papers are arranged in the six themes Organ Mechanics Tissue Mechanics Cell Mechanics Molecular Mechanics Materials Tools Devices Techniques Special Topics **Person to Person** Kathleen M.
