affect in some way the government which runs the country day to day In an afterword the authors examine some of the key issues to be considered should New Zealand become a republic The parliamentary democracy that we take for granted can conceal New Zealand's ultimate constitutional underpinnings in the monarchy But as the authors make clear the monarchy's continuing role in New Zealand's constitution is significant And understanding the roles of the Queen the Governor General and the Crown will be critical as we look forward to debates about the possibility of a republic in New Zealand **History**

Fairness and Freedom David Hackett Fischer, 2012-02-10 *Fairness and Freedom* compares the history of two open societies New Zealand and the United States with much in common Both have democratic polities mixed enterprise economies individuated societies pluralist cultures and a deep concern for human rights and the rule of law But all of these elements take different forms because constellations of value are far apart The dream of living free is America's Polaris fairness and natural justice are New Zealand's Southern Cross Fischer asks why these similar countries went different ways Both were founded by English speaking colonists but at different times and with disparate purposes They lived in the first and second British Empires which operated in very different ways Indians and Maori were important agents of change but to different ends On the American frontier and in New Zealand's Bush material possibilities and moral choices were not the

same Fischer takes the same comparative approach to parallel processes of nation building and immigration women's rights and racial wrongs reform causes and conservative responses war fighting and peace making and global engagement in our own time with similar results On another level this book expands Fischer's past work on liberty and freedom It is the first book to be published on the history of fairness And it also poses new questions in the old tradition of history and moral philosophy Is it possible to be both fair and free In a vast array of evidence Fischer finds that the strengths of these great values are needed to correct their weaknesses As many societies seek to become more open never twice in the same way an understanding of our differences is the only path to peace

Changing Times Jenny Carlyon, Diana Morrow, 2014-02-01 From the golden weather of postwar economic growth through the globalization economic challenges and protest of the 1960s and 1970s to the free market revolution and new immigrants of the 1980s and 1990s and beyond this account the most complete and comprehensive history of New Zealand since 1945 illustrates the chronological and social history of the country with the engaging stories of real individuals and their experiences Leading historians Jennifer Carlyon and Diana Morrow discuss in great depth New Zealand's move toward nuclear free status its embrace of a small state free market ideology and the seeming rejection of its citizens of a society known for the worship of averages Stories of pirate radio in Auckland's Hauraki Gulf the first DC8 jets landing at Mangere airport feminists liberating pubs public protests over the closing of post offices and indigenous language nests vividly demonstrate how a postwar society famous around the world for its dull conformity became one of the most ethnically economically and socially diverse countries on earth

Science and the Pacific War Roy M. MacLeod, 1999-12-31 In 1995 the fiftieth anniversary of the end of the Second World War occasioned many reflections on the place of science and technology in the conflict That the war ended with Allied victory in the Pacific theatre inevitably focussed attention upon the Pacific region and particularly upon the Manhattan project and its outcome It was in the Pacific that Western physics and engineering gave birth to the Atomic Age However the Pacific war had also proved a testing time and a testing space for other disciplines and institutions Extreme environments and operational distances and the fundamental demands of logistics required the Allies and the Japanese to innovate many scientific and technological practices Just as medicine and botany were called upon to fight tropical diseases and insect pests so engineers anthropologists and geographers were called upon to understand local conditions and climates and to work with local peoples whose traditional lives were changed forever by the experience At the same time the war played midwife to a host of new developments not least in scientific intelligence and in chemical and biological weapons which were to acquire far greater importance after 1945

The Oxford History of New Zealand William Hosking Oliver, Bridget R. Williams, 1981
