## Situations Philosophiques:

*A History of Philosophy in the Twentieth Century* Christian Delacampagne, 2001-11-05 In *A History of Philosophy in the Twentieth Century* Christian Delacampagne reviews the discipline's divergent and dramatic course and shows that its greatest figures even the most unworldly among them were deeply affected by events of their time From Ludwig Wittgenstein whose famous *Tractatus* was actually composed in the trenches during World War I to Edmund Husserl and Martin Heidegger one who found himself barred from public life with Hitler's coming to power the other a member of the Nazi party who later refused to repudiate German war crimes From Bertrand Russell whose lifelong pacifism led him to turn from logic and mathematics to social and moral questions and Jean Paul Sartre who made philosophy an occasion for direct and personal political engagement to Rudolf Carnap a committed socialist and Karl Popper a resolute opponent of Communism From the Vienna Circle and the Frankfurt School to the contemporary work of philosophers as variously minded as Jacques Derrida Jürgen Habermas and Hilary Putnam The thinking of these philosophers and scores of others cannot be understood without being placed in the context of the times in which they lived *Sartre's Existential Psychoanalysis* Mary Edwards, 2022-10-20 Western philosophical orthodoxy places many aspects of other people's lives outside the scope of our knowledge Demonstrating an alternative to this view however this book argues that Jean Paul Sartre's application of his unique psychoanalytic method to Gustave Flaubert is the culmination of his project to show that it is possible to know everything there is to know about another person It examines how Sartre aims to revolutionize our way of thinking about others by presenting his existential psychoanalysis as the means to knowledge of both ourselves and others By so doing it highlights how his determination to solve the longstanding philosophical conundrum about other minds drives him not only to incorporate insights from Descartes Hegel Husserl Freud Marx and Beauvoir into his philosophy but also to supplement and enhance his philosophy through the development and application of a new form of psychoanalysis Sartre's Existential Psychoanalysis integrates for the first time Sartre's psychoanalysis into his overarching philosophical project By offering a critical interrogation of the role his psychoanalytical studies played in the development of his existentialism Mary Edwards uncovers the overlooked philosophical significance of his existential psychoanalysis and brings it into a new and productive dialogue with current research in the fields of philosophy psychology and psychotherapy **Chiasmi International** 17 Aa. **Materialism: A Historico-Philosophical Introduction** Charles T. Wolfe,2016-01-06 This book provides an overview of key features of philosophical materialism in historical perspective It is thus a study in the history and philosophy of materialism with a particular focus on the early modern and Enlightenment periods leading into the 19th and 20th centuries For it was in the 18th century that the word was first used by a philosopher La Mettrie to refer to himself Prior to that materialism was a pejorative term used for wicked thinkers as a near synonym to atheist Spinozist or the delightful Hobbist The book provides the different forms of materialism particularly distinguished into claims about the material nature of the world and about the material nature of the mind and then focus on materialist approaches to body and embodiment selfhood ethics laws of nature reductionism and determinism and overall its relationship to science For materialism is often

understood as a kind of philosophical facilitator of the sciences and the author wants to suggest that is not always the case. Materialism takes on different forms and guises in different historical, ideological, and scientific contexts as well, and the author wants to do justice to that diversity. Figures discussed include Lucretius, Hobbes, Gassendi, Spinoza, Toland, Collins, La Mettrie, Diderot, d'Holbach, and Priestley. Berger, J. J. C. Smart, and D. M. Armstrong.

**The Memory of the World** Ted Toadvine, 2024-05-14 Advancing a phenomenological approach to deep time. Our imagination today is dominated by the end of the world from sci-fi and climate fiction to actual predictions of biodiversity collapse, climate disruption, and the emergence of the Anthropocene. This obsession with the world's precarity. *The Memory of the World* contends, relies on a flawed understanding of time that neglects the past and present with the goal of managing the future. Not only does this mislead sustainability efforts, it diminishes our encounters with the world and with human and nonhuman others. Here Ted Toadvine takes a phenomenological approach to deep time to show how our apocalyptic imagination forgets the sublime and uncanny dimensions of the geological past and far future. Guided by original readings of Maurice Merleau-Ponty, Emmanuel Levinas, Jacques Derrida, Jean-Luc Nancy, and others, he suggests that reconciling our embodied lives with the memory of the earth transforms our relationship with materiality, other forms of life, and the unprecedented future. Integrating insights from phenomenology, deconstruction, critical animal studies, and new materialism, *The Memory of the World* argues for a new philosophy of time that takes seriously the multiple pleated and entangled temporal events spanning cosmic, geological, evolutionary, and human durations.

**The New Politics of Materialism** Sarah Ellen Zweig, John Zammito, 2017-07-14 New materialism challenges the mechanistic models characteristic of early modern philosophy that regarded matter as largely passive and inert. Instead, it gives weight to topics often overlooked in such accounts: agency, vitalism, complexity, contingency, and self-organization. This collection, which includes an international roster of contributors from philosophy, history, literature, and science, is the first to ask what is new about the new materialism and place it in interdisciplinary perspective. Against current theories of new materialism, it argues for a deeper engagement with materialism's history, questions whether matter can be lively, and asks whether new materialism's wish to revitalize politics and the political lives up to its promise.

Rajan, 2002 This book disentangles two terms that were conflated in the initial Anglo American appropriation of French  
theory deconstruction and poststructuralism Focusing on Sartre Derrida Foucault and Baudrillard but also considering  
Levinas Blanchot de Man and others it traces the turn from a deconstruction inflected by phenomenology to a  
poststructuralism formed by the rejection of models based on consciousness in favor of ones based on language and structure  
The book provides a wide ranging and complex genealogy of French theory from the 1940s onward placing particular  
emphasis on the largely neglected early work of the theorists involved and on deconstruction s continuing relevance The  
author argues that deconstruction is a form of radical antiscientific modernity an interdisciplinary reconfiguration of  
philosophy as it confronted the positivism of the human sciences in the 1960s By contrast poststructuralism is a type of  
postmodern theory inflected by changes in technology and the mode of information Inasmuch as poststructuralism is founded  
upon its constitutive loss of phenomenology in Judith Butler s phrase the author is also concerned with the ways  
phenomenology particularly Sartre s forgotten but seminal Being and Nothingness is remembered repeated in different ways  
and never quite worked through in its theoretical successors Thus the book also exemplifies a way of reading intellectual  
history that is not only concerned with the transmission of concepts but also with the processes of transference mourning  
and disavowal that inform the relationships between bodies of thought *Person, Society and Value* Paulina Taboada, K.F.  
Cuddeback, P. Donohue-White, 2013-03-14 Besides offering a critical analysis of the WHO definition and a review of both  
ancient and contemporary conceptions of health the cooperative effort of physicians and philosophers presented in this book  
works through the challenges which any definition of health faces if it is to be both truly personalist and at the same time  
operational The overall purpose of this book is to capture the essentials of human health and to propose the outlines for a  
personalist understanding of this concept i e a conception that does justice to the personal nature of human beings by  
introducing dimensions that are essential to personal life and well being such as the realms of rationality affectivity and  
freedom the realms of meaning values morality and spirituality the realms of social and interpersonal relations **Society**  
**5.0** Bruno Salgues, 2018-10-16 Following the rapid development of connected technologies which are now highly  
sophisticated and spread across the globe Society 5.0 has emerged and brought with it a dramatic societal shift In 1998  
Kodak the world leader in photographic film had 170 000 employees It thus seemed unthinkable that just 3 years later the  
majority of people would stop taking photographs to paper film and that Kodak would have disappeared These are the stakes  
of this new society that is taking shape This book which does not seek to critique current politics management or marketing  
literature aims to fight against the excesses of this often misunderstood Society 5.0 and to present the ideas and associated

technologies that comprise it all working towards societal improvement Among these technologies artificial intelligence robotics digital platforms and 3D printing are undoubtedly the most important and thus receive the greatest focus

**Heidegger and French Philosophy** Tom Rockmore, 2002-09-11 Martin Heidegger's impact on contemporary thought is important and controversial However in France the influence of this German philosopher is such that contemporary French thought cannot be properly understood without reference to Heidegger and his extraordinary influence Tom Rockmore examines the reception of Heidegger's thought in France He argues that in the period after the Second World War due to the peculiar nature of the humanist French Philosophical tradition Heidegger became the master thinker of French philosophy Perhaps most importantly he contends that this reception first as philosophical anthropology and later as postmetaphysical humanism is systematically mistaken

Comprendre la phénoménologie Natalie Depraz, 2012-10-31 Cet ouvrage devenu référence synthétise les multiples significations de la phénoménologie dans une logique dynamique en apportant un éclairage inédit sur des thèmes majeurs la nécessité de la relation l'expérience la description comme mode de formulation philosophique la recherche d'une méthode sans pré-suppositions Elle permet aux étudiants de s'approprier cette démarche philosophique dans sa mise à l'épreuve pratique et en relation avec d'autres disciplines et champs d'expérience Natalie Depraz est professeur de philosophie à l'université de Rouen

Grand Hotel Abyss Vladimir Safatle, 2016-02-01 Originally published in Portuguese as Grande Hotel Abismo In the last two decades recognition arguably one of the most central notions of the dialectical tradition since Hegel has once again become a crucial philosophical theme Nevertheless the new theories of recognition fail to provide room for reflection on transformation processes in politics and morality This book aims to recover the disruptive nature of the dialectical tradition by means of a severe critique of the dominance of an anthropology of the individual identity in contemporary theories of recognition This critique implies a thorough rethinking of basic concepts such as desire negativity will and drive with Hegel Lacan and Adorno being our main guides The Marxist philosopher György Lukács said that the Frankfurt School Horkheimer

Adorno etc left us with nothing but negativity towards the state of the world Their work failed to open up a concrete possibility of practical engagement in this world All too eager to describe the impasses of reason the Frankfurt philosophers remained trapped in a metaphorical Grand Hotel Abyss Grand Hotel Abgrund It was as living and being guardian of lettered civilization in a beautiful and melancholy grand hotel of which the balconies face a gaping abyss But perhaps in this way Lukacs gave and no doubt without realizing it himself a perfect definition of contemporary philosophy namely to confront chaos to peer into what appears to a certain rationality as an abyss and to feel good about it Touching Hegelian dialectics critical theory and psychoanalysis Grand Hotel Abyss gives a new meaning to the notion of negativity as the first essential step for rethinking political and moral engagement

**The History and Philosophy of Materialism** Charles T. Wolfe, John Symons, 2024-11-26 Materialism the view that facts are dependent upon or reducible to physical processes is one of the most long standing and controversial of all philosophical theories Originating in antiquity its proponents include Epicurus Hobbes Diderot Darwin and Marx whilst its impact on modern physics and consciousness debates reverberates strongly today It is also an important yet generally overlooked feature of Indian Chinese and Islamic thought This major collection the first of its kind explores the fascinating philosophical history of materialism from the ancient world to the twenty first century Comprising thirty one chapters by an international team of contributors the volume is divided into six clear parts Ancient Non Western and Medieval Philosophy Renaissance and Early Modern Philosophy Enlightenment Materialisms Nineteenth Century Philosophy Twentieth Century Philosophy Contemporary Philosophy Philosophy of Mind Metaphysics and Critique Within these sections key topics are covered including materialism in classical Greece India and China and Aztec metaphysics Renaissance materialism and anti materialism materialism and Islamic philosophy materialism in the French and German Enlightenment atheism and materialism nineteenth century materialist controversies and debates in physics Marxism and materialism physicalism and the new materialism The History and Philosophy of Materialism is ideal for those studying and researching the history of this vital philosophical movement especially those with an interest in the history and philosophy of science ancient and early modern philosophy and the Enlightenment It will also be valuable reading for those in related disciplines such as history sociology and religion

**The Passions of the Soul in the Metamorphosis of Becoming** Anna-Teresa Tymieniecka, 2013-03-09 Over the millennia philosophy has sought the ultimate understanding of the full human horizon of existence as well as of human destiny and the ultimate sense of it All The innumerable attempts to grasp the answers to these questions each taking its own approach and having its own preconceptions have engendered a range of different philosophical approaches one so broad that seemingly unbridgeable rifts impede possible cross fertilizing communication And yet the themes of all of them e g the immeasurable cosmos life the individual being bearing life the human person within his or her world and his or her longings to transcend that world the human mind its pragmatic cognitive tools creative speculative pursuits remain constants The logos they all share is one It is not that no vicarious

sharing of intuitive glimpses by the proponents of the varied doctrines and methods in question occurs The history of philosophy is in fact marked by the juxtaposing of theories and approaches having different trajectories and by the mixing of insights the crossing of borders etc However what is greatly needed is in depth comparison of the various doctrines and a reflection on the contrasting opposing clashing perspectives that seeks foundations for all of them in the human creative condition in that microcosm that extends its tentacles toward the two great infinities the external infinity of the cosmos and the internal infinity of transcending destiny
