Soviet Fighters:

Soviet Fighters of the Second World War Jason Nicholas Moore, 2021-07-30 The Red Air Force had just started to re-equip with modern monoplane fighters when the Germans opened Operation Barbarossa the invasion of the Soviet Union. Hundreds of fighters were destroyed in the first few days but many of these were obsolete biplanes. Soviet Fighters of the Second World War details fighter development from the dark days of Barbarossa to eventual triumph over Berlin. Starting with outdated aircraft such as the Polikarpov Po 2 biplane and monoplane fighters, the Soviets then settled on two main lines of development: the inline engine LaGG 3 and its radial engine derivatives the La 5 and La 7, and the inline engine Yakovlev fighters which were produced in greater numbers than any other series of fighters. Not only are these aircraft accurately described but experimental fighters are also dealt with. In addition, colour profiles illustrate these aircraft in terms of design, camouflage and markings. From the I 15bis biplane of the late 1930s to the superb La 7 and Yak 3 fighters of the last year of the war, all Red Air Force fighters are covered in this comprehensive volume. *Soviet Fighters* Doug Richardson, 1989-09

Soviet Cold War Fighters Alexander Mladenov, 2017-04-20 Beautifully illustrated with many rare and unpublished photographs, *Soviet Cold War Fighters* looks at the main development periods of Soviet fighter designs and covers all the important features and developments for each. A total of four generations of fighter were developed from the late 1940s to the early 1980s that witnessed the most iconic and powerful fighters such as the legendary MiG 15, MiG 21, Tu 128, Su 9, MiG 23, MiG 25 reach for the skies, followed by the modern day MiG 29, MiG 31 and Su 27 which strike fear in the West for their phenomenal weaponry and blistering performance. All aircraft are described in detail with facts and figures including their weapons and instances of combat employment as well as explaining how the Cold War drastically changed Soviet fighter design to counter the West. Researched and written by Alexander Mladenov, a leading aviation journalist, this is a highly detailed testament to leading Soviet fighter design and development. *The Russian Air Force in the Eyes of German Commanders* Generalleutnant Walter Schwabedissen, 2017-06-28 *The Russian Air Force in the Eyes of German Commanders* by Generalleutnant a D Walter Schwabedissen is one of a series of historical studies written by or based on information supplied by former key officers of the GAF for the United States Air Force Historical Division. The overall purpose of the series is twofold: 1 To provide the U S Air Force with a comprehensive and insofar as possible authoritative history of a major air force which suffered defeat in World War II, a history prepared by many of the principal and responsible leaders of that air force; 2 to provide a firsthand account of that air force's unique combat in a major war, especially its fight against the forces of the Soviet Union. This series of studies therefore covers in large part virtually all phases of the Luftwaffe's operations and organization from its camouflaged origin in the Reichswehr during the period of secret German rearmament following World War I through its participation in the Spanish Civil War and its massive operations and final defeat in World War II, with particular attention to the air war on the Eastern Front. In World War II the Russian Air Force came of age. The men most

vitaly concerned with this aside from the Russians themselves were commanders in the German armed forces The experience of these commanders then constitutes a unique source for information on an organization whose capabilities both past and future are of vital concern to the world The chief German experience with the Russian Air Force derives from World War II It was during this period that the Russians learned most from the Germans and the Germans learned most about the Russians This study exploits this broad German experience Compiled from the official records of the German Air Force and from reports written by German commanders who saw action in the Russian campaign it documents many of the Russian Air Force s achievements as well as its failures *Russian Aviation and Air Power in the Twentieth Century* Robin Higham,John T. Greenwood,Von Hardesty,1998 In 1977 Robin Higham and Jacob Kipp edited *Soviet Aviation and Air Power* the first comprehensive study of Russian aviation This new volume brings together both new editors and new contributors to take a fresh look at Russian and Soviet aviation in the twentieth century Since the collapse of the Soviet Union in 1990 new archives have become available as well as new perspectives and all the contributors to this new volume have based their research on newly available material While some chapters update those in the 1977 work most break new ground such as those dealing with the aircraft industry the designers and Soviet Air combat on the periphery The Department of State Bulletin ,1959 The official monthly record of United States foreign policy **World War II in Europe** David T. Zabecki,2015-05-01 World War II defined the 20th century and shaped many events from the decolonization of Africa to the rise and fall of the Berlin Wall This encyclopedia offers a focused overview of this complex and volatile era the circumstances that led up to war the underlying causes its unfolding and consequences Organized for quick and precise access More than 1300 entries by 150 experts are arranged in six sections for easy reference and consultation All the key ideas events actions weapons individuals and organizations that played vital roles in the war are covered from the Axis Pact to the Arab League from the OSS to the Africa Korps from the Chetniks to the Jedburghs from the battle of Kursk to Operation Mincemeat from Bill Donovan to Otto Skorzeny from Gestapo to SMERSH from Georgi Zhukov to Jean Leclerc from the 88 gun to the Norden Bombsight Covers important neglected subjects The Encyclopedia puts special emphasis on the often neglected operations in Eastern Europe and Russia A key section inspects and rates all the major weapons with handy tables for easy comparison And in recognition of the first large scale participation of women in the war the volume thoroughly documents their individual and unit contributions to the Allied effort Finally the encyclopedia discusses battlefield realities that explain for example why the airborne drops at Normandy succeeded and the ones at Arnheim failed A bibliography glossary maps photographs and weapons and data tables enhance the coverage Also includes 16 maps Department of Defense Authorization for Appropriations for Fiscal Year 1981 United States. Congress. Senate. Committee on Armed Services,1980 *NASA Technical Translation* United States. National Aeronautics and Space Administration,1970 Soviet Fighters of the Second World War Jason Moore,2021-06-09 A comprehensive highly detailed and highly illustrated history of Soviet built fighters

used during the Second World War including detailed descriptions of both operational and experimental fighters It has photographs and color profiles of all fighter aircraft Drawings from period flight and technical manuals are also included
