Soviet Space

Jiyuan Zhang

Soviet Space:

Race Into Space Brian Harvey, 1988 **Soviet Space Programs, 1976-80: Manned space programs and space life sciences**, 1982 **Soviet Space Programs: Organization, Plans, Goals, and International Implications** United States. Congress. Senate. Aeronautical and Space Sciences, 1962 **Soviet Space Programs, 1976-80 (with Supplementary Data Through 1983): Supporting vehicles and launch vehicles**, 1984 **Soviet space programs, 1976-80 (with supplementary data through 1983)**, 1984 **Soviet space programs, 1976-80 (with supplementary data through 1983)**, 1984 **Soviet Union**, 1965 **Into the Cosmos** James T. Andrews, Asif A. Siddiqi, 2011-09-25 The launch of the Sputnik satellite in October 1957 changed the course of human history In the span of a few years Soviets sent the first animal into space the first man and the first woman These events were a direct challenge to the United States and the capitalist model that claimed ownership of scientific aspiration and achievement The success of the space program captured the hopes and dreams of nearly every Soviet citizen and became a critical cultural vehicle in the country's emergence from Stalinism and the devastation of World War II It also proved to be an invaluable tool in a worldwide propaganda campaign for socialism a political system that could now seemingly accomplish anything it set its mind to Into the Cosmos shows us the fascinating interplay of Soviet politics science and culture during the Khrushchev era and how the space program became a binding force between these elements The chapters examine the ill fitted use of cosmonauts as propaganda props the manipulation of gender politics after Valentina Tereshkova's flight and the use of public interest in cosmology as a tool for promoting atheism Other chapters explore the dichotomy of promoting the space program while maintaining extreme secrecy over its operations space animals as media darlings the history of Russian space culture and the popularity of space themed memorabilia that celebrated Soviet achievement and planted the seeds of consumerism **Nation-Building and Identity in the Post-Soviet Space** Rico Isaacs, Abel Polese, 2016-04-14 Nation building as a process is never complete and issues related to identity nation state and regime building are recurrent in the post Soviet region This comparative inter disciplinary volume explores how nation building tools emerged and evolved over the last twenty years Featuring in depth case studies from countries throughout the post Soviet space it compares various aspects of nation building and identity formation projects Approaching the issue from a variety of disciplines and geographical areas contributors illustrate chapter by chapter how different state and non state actors utilise traditional instruments of nation construction in new ways while also developing non traditional tools and strategies to provide a contemporary account of how nation formation efforts evolve and diverge **The Soviet Space Race with Apollo** Asif A. Siddiqi, 2000 Winner of the Emme Award for Astronautical Literature 2001 The essential reference work for Soviet Russian space history for anyone hoping to make sense of the too many truths of Soviet Space history Journal of Military History We finally have a definitive English language history covering the first three decades of the Soviet Union's space program Sixteen years in the making Asif Siddiqi's amazingly detailed

book provides a kaleidoscopic view of the technical and political evolution of Soviet missile and space projects a veritable gold mine of factual information *Air Power History* An extraordinary volume This is not simply an account of one side of the space race It is nothing less than the first full scale detailed explanation of how and why the Soviet Union led the world into space It belongs on the shelf of every historian with an interest in flight technology and politics the Cold War or any one of a score of related topics *The Public Historian* No space buff's library will be complete without this book Readers will marvel at the complex interactions between design bureaus and will enjoy getting to know the people behind the failed Soviet effort a vital step toward putting Apollo's victory in context *Smithsonian Air and Space* Absolutely mandatory on the bookshelf of anyone interested in space *Encyclopedia Astronautica* First published by NASA in 2000 as *Challenge to Apollo* these two volumes are the first comprehensive history of the Soviet manned space programs covering a period of thirty years from the end of World War II when the Soviets captured German rocket technology to the collapse of their moon program in the mid 1970s The spectacular Soviet successes of Sputnik the first Earth satellite 1957 and Yuri Gagarin the first man in space 1961 shocked U S leaders and prompted President John F Kennedy to set the goal of landing a man on the moon before the end of the 1960s The moon race culminated with the historic landing of Neil Armstrong and Buzz Aldrin on the moon in 1969 coincidentally the first Soviet unmanned moon probe crashed on its surface while the American astronauts were at Tranquility Base The epic story of the Soviet space program remained shrouded in secrecy until the unprecedented opening of top secret documents Based almost entirely on these Russian language sources and numerous interviews with veterans Siddiqi's book breaks through the rumors hearsay and speculation that characterized books on the Soviet space program published during the Cold War years Supplementing the text with dozens of previously classified photographs he weaves together the technical political and personal history of the major Soviet space programs providing the other side of the history of human space flight Asif A Siddiqi is a Ph D candidate in history at Carnegie Mellon University

Getting the books **Soviet Space** now is not type of challenging means. You could not and no-one else going as soon as ebook growth or library or borrowing from your links to admission them.
