Soviet Military Strategy in Space Nicholas L. Johnson, 1987 I bogen undersøges Sovjets deltagelse og rolle i militariseringen af det ydre rum fra den første satellit i okt 1957 til anti satellit systemer og ripost på USAs SDI **The Militarization and Weaponization of Space** Matthew Mowthorpe, 2004-01-01 The militarization of space began as a rivalry between the United States and the Soviet Union and grew to enormous proportions during the height of the Cold War Satellite reconnaissance navigation and weapons guidance and electronic intelligence comprise only a few of the efforts taken to militarize and dominate space Today as the prominence of information technology computing and telecommunications advances so does the concept of space as a battlefield In *The Militarization and Weaponization of Space* Matthew Mowthorpe diligently analyzes the military space policies of the United States the Soviet Union Russia and the People's Republic of China from the Cold War period to the present day Mowthorpe focuses on the development of the ballistic missile defense and other anti satellite systems and aptly assesses to what degree space will become armed This work cogently addresses an issue of increasing urgency to scholars of international politics **Soviet Military Strategy** Vasilii Danilovich Sokolovskii, 1963 **The Soviet Space Programme** Ronald D. Humble, 2024-04-12 The Soviet Space Programme 1988 presents a comprehensive overview of the Soviet space programme from its beginnings up to the end of the 1980s One important theme explored is the degree to which the Soviet space programme was oriented towards military capabilities The book concludes that the degree of military involvement was indeed high **The Politics of Space Security** James Moltz, 2011-06-29 The past five decades have witnessed often fierce international rivalry in space but also surprising military restraint Now with an increasing number of countries capable of harming U S space assets experts and officials have renewed a long standing debate over the best route to space security Some argue that space defenses will be needed to protect critical military and civilian satellites Others argue that space should be a sanctuary from deployed weapons and military conflict particularly given the worsening threat posed by orbital space debris Moltz puts this debate into historical context by explaining the main trends in military space developments since Sputnik their underlying causes and the factors that are likely to influence their future course This new edition provides analysis of the Obama administration's space policy and the rise of new actors including China India and Iran His conclusion offers a unique perspective on the mutual risks militaries face in space and the need for all countries to commit to interdependent environmentally focused space security *Soviet Space Programs: Organization, Plans, Goals, and International Implications* United States. Congress. Senate. Aeronautical and Space Sciences, 1962 **The Politics of Space Security** James Clay Moltz, 2008-06-24 At a time when no other country enjoys the advantages that the United States currently reaps from space some U S officials argue that U S space defenses will be needed to protect access to critical military and civilian assets in orbit Others argue that space should be a valuable sanctuary from deployed weapons and military conflict To inform this debate and develop meaningful

guidelines for the future Clay Moltz has undertaken the only comprehensive study of the first 50 years of space security highlighting the main trends in military space developments their underlying causes and the factors that are likely to influence their future course What emerges is a picture of surprising military restraint shown by the United States and the Soviet Union in space and the inescapable conclusion that the only way forward is through a multilateral commitment to interdependent environmentally focused space security Critical Issues in the History of Spaceflight Stephen J. Dick, Steven J. Dick, Roger D. Launius, 2006 In March 2005 the NASA History Division and the Division of Space History at the National Air and Space Museum brought together a distinguished group of scholars to consider the state of the discipline of space history This volume is a collection of essays based on those deliberations The meeting took place at a time of extraordinary transformation for NASA stemming from the new Vision of Space Exploration announced by President George W Bush in January 2004 to go to the Moon Mars and beyond This Vision in turn stemmed from a deep reevaluation of NASA's goals in the wake of the Space Shuttle Columbia accident and the recommendations of the Columbia Accident Investigation Board The new goals were seen as initiating a New Age of Exploration and were placed in the context of the importance of exploration and discovery to the American experience Amazon **The International Politics of Space** Michael Sheehan, 2007-10-15 This book examines the interaction of international politics and space using case studies and various theoretical approaches to international relations Critical issues in the history of spaceflight Steven J.
