Soy Bean Magic Delicious Recipes:

Soy Bean Magic Gwen Mallard, 1976 **Top 100 Food Plants** Ernest Small, 2009 This beautifully illustrated book reviews scientific and technological information about the world's major food plants and their culinary uses. An introductory chapter discusses nutritional and other fundamental scientific aspects of plant foods. The 100 main chapters deal with a particular species or group of species. All categories of food plants are covered including cereals, oilseeds, fruits, nuts, vegetables, legumes, herbs, spices, beverage plants, and sources of industrial food extracts. Information is provided on scientific and common names, appearance, history, economic and social importance, food uses including practical information on storage and preparation, as well as notable curiosities. There are more than 3000 literature citations in the book and the text is complemented by over 250 exquisitely drawn illustrations. Given the current alarming rise in food costs and increasing risk of hunger in many regions, specialists in diverse fields will find this reference work to be especially useful. As well, those familiar with Dr. Small's books or those with an interest in gardening, cooking, and human health in relation to diet will want to own a copy of this book.
