Space And Time Scale Variability And Interdependencies In Hydrological Processes:

Space and Time Scale Variability and Interdependencies in Hydrological Processes R. A. Feddes, 1995-08-24 This book presents the integrated contributions of hydrologists meteorologists and ecologists to the first IHP IAHS George Kovacs Colloquium in connection with the study of global hydrology and climate change The atmospheric hydrological and terrestrial components of the Earth's systems operate on different time and space scales Resolving these scaling incongruities as well as understanding and modelling the complex interaction of land surface processes at the different scales represent a major challenge for hydrologists ecologists and meteorological scientists alike This book deals with time and space scale variations with reference to several topics including soil water balance ecosystems and interaction of flow systems and macroscale hydrological modelling This book will be of great use to researchers engineers and forecasters with an interest in space and time scale variability

Impacts of Climate Change and Climate Variability on Hydrological Regimes Jan C. van Dam, 2003-10-16 Examines the implications of possible climate changes and variability on both global and regional water resources

Space and Time Scale Variability and Interdependencies in Hydrological Process Reinder A. Feddes, 1992*

Spatial Patterns in Catchment Hydrology Rodger Grayson, Günter Blöschl, 2001-08-06 Describes use of observed patterns in understanding and modelling hydrological response for researchers and graduate students

Echelles en Hydrologie Et Gestion de L'eau Ioulia Tchiguirinskaia, Michael Bonell, Pierre Hubert, 2004

Hydrological Modelling in Arid and Semi-Arid Areas Howard Wheeler, Soroosh Sorooshian, K. D. Sharma, 2007-11-22 Arid and semi arid regions are defined as areas where water is at its most scarce The hydrological regime in these areas is extreme and highly variable and they face great pressures to deliver and manage freshwater resources However there is no guidance on the decision support tools that are needed to underpin flood and water resource management in arid areas UNESCO initiated the Global network for Water and Development Information for arid lands GWADI and arranged a workshop of the world's leading experts to discuss these issues This book presents chapters from contributors to the workshop and includes case studies from the world's major arid regions to demonstrate model applications and web links to tutorials and state of the art modelling software This volume is a valuable reference for researchers and engineers working on the water resources of arid and semi arid regions

Floods in a Changing Climate P. P. Mujumdar, D. Nagesh Kumar, 2012-11-22 Provides unique synthesis of various modeling methodologies used to aid planning and operational decision making for academic researchers and professionals

Water Ecosystem Services Julia Martin-Ortega, 2015-03-26 This book uses ecosystem services based approaches to address major global and regional water challenges for researchers students and policy makers

Climate Changes during the Holocene and their Impact on Hydrological Systems Arie S. Issar, 2004-08-05 It is now widely accepted that increasing concentrations of greenhouse gases in the atmosphere are causing higher global atmospheric temperatures However there is still a great deal of uncertainty about the likely effects of

such a temperature rise on climate and even more about the impacts of climate change and variability on the world's hydrological regimes and socio-economic systems. Studying the effects of climate variability in the past can give clues as to possible future effects. This volume provides a comprehensive review of the effects of climate variability on hydrological and human systems in the Holocene, the last 10 000 years, in various parts of the world. The book concentrates on the regions bordering the Mediterranean Sea, western and central Europe, China, Japan, West and South Africa, and the southwestern USA. This book will be of value to researchers and professionals in hydrology, climatology, geology, and historical geography.

Managing and Transforming Water Conflicts Jerome Delli Priscoli, Aaron T. Wolf, 2010-02-04. What is the one thing that no one can do without? Water. Where water crosses boundaries, be they economic, legal, political, or cultural, the stage is set for disputes between different users trying to safeguard access to a vital resource while protecting the natural environment. Without strategies to anticipate, address, and mediate between competing users, intractable water conflicts are likely to become more frequent, more intense, and more disruptive around the world. In this book, Delli Priscoli and Wolf investigate the dynamics of water conflict and conflict resolution from the local to the international. They explore the inexorable links between three facets of conflict management and transformation: Alternative Dispute Resolution (ADR), public participation, and institutional capacity. This practical guide will be invaluable to water management professionals as well as to researchers and students in engineering, economics, geography, geology, and political science who are involved in any aspects of water management.
