Space Dogs Pioneers Of Space Travel:

Space Dogs Chris Dubbs, 2003 Back when scientists knew nothing about space travel back when rockets were new a group of Russian cosmonauts rode rockets to the edge of space and into earth orbit These pioneer space travelers were dogs space dogs of the Soviet space program For 15 years space dogs occupied the world stage blazing trails as the first astronauts Their flights taught scientists how living beings reacted to rocket travel and tested the equipment that would be used for human space flight The age of the space dog extended from the first launch in 1951 until the final record breaking dog flight in 1966 Some dogs won world wide fame Most of them however worked and died in obscurity They were all pioneers of space travel And no one has ever told their story Until now Space Dogs dramatizes the training of the dogs the harrowing early flights the tragic accidents the fame that came to the program after the launch of Laika in Sputnik 2 and the final flights leading up to the first manned flight Space Dogs includes never before published photos from the archives of Novosti the Russian News Agency

Space Dogs Chris Dubbs, 2003-03-01 NULL *Laika* Nick Abadzis, 2007-09-04 Laika was the abandoned puppy destined to become Earth's first space traveler This is her journey Nick Abadzis masterfully blends fiction and fact in the intertwined stories of three compelling lives Along with Laika there is Korolev once a political prisoner now a driven engineer at the top of the Soviet space program and Yelena the lab technician responsible for Laika's health and life This intense triangle is rendered with the pitch perfect emotionality of classics like *Because of Winn-Dixie* *Shiloh* and *Old Yeller* Abadzis gives life to a pivotal moment in modern history casting light on the hidden moments of deep humanity behind history Laika's story will speak straight to your heart

Animals in Space Colin Burgess, Chris Dubbs, 2007-01-24 This book is as a detailed but highly readable and balanced account of the history of animal space flights carried out by all nations but principally the United States and the Soviet Union It explores the ways in which animal high altitude and space flight research impacted on space flight biomedicine and technology and how the results both successful and disappointing allowed human beings to then undertake that same hazardous journey with far greater understanding and confidence This complete and authoritative book will undoubtedly become the ultimate authority on animal space flights

The Taking of K-129 Josh Dean, 2018-09-25 An incredible true tale of espionage and engineering set at the height of the Cold War a mix between *The Hunt for Red October* and *Argo* about how the CIA the U.S. Navy and America's most eccentric mogul spent six years and nearly a billion dollars to steal the nuclear armed Soviet submarine K-129 after it had sunk to the bottom of the Pacific Ocean all while the Russians were watching In the early hours of February 25 1968 a Russian submarine armed with three nuclear ballistic missiles set sail from its base in Siberia on a routine combat patrol to Hawaii Then it vanished As the Soviet Navy searched in vain for the lost vessel a small highly classified American operation using sophisticated deep sea spy equipment found it wrecked on the sea floor at a depth of 16 800 feet far beyond the capabilities of any salvage that existed But the potential intelligence assets onboard the ship the nuclear warheads battle orders and cryptological machines justified

going to extreme lengths to find a way to raise the submarine So began Project Azorian a top secret mission that took six years cost an estimated 800 million and would become the largest and most daring covert operation in CIA history After the U S Navy declared retrieving the sub impossible the mission fell to the CIA s burgeoning Directorate of Science and Technology the little known division responsible for the legendary U 2 and SR 71 Blackbird spy planes Working with Global Marine Systems the country s foremost maker of exotic deep sea drilling vessels the CIA commissioned the most expensive ship ever built and told the world that it belonged to the reclusive billionaire Howard Hughes who would use the mammoth ship to mine rare minerals from the ocean floor In reality a complex network of spies scientists and politicians attempted a project even crazier than Hughes s reputation raising the sub directly under the watchful eyes of the Russians **Space**

Nothing captivates the human imagination like the vast unknowns of space Ancient petroglyphs present renderings of the heavens proof that we have been gazing up at the stars with wonder for thousands of years Since then mankind has systematically expanded our cosmic possibilities What were once flights of fancy and dreams of science fiction writers have become nearly routine a continuous human presence orbiting the Earth probes flying beyond our solar system and men walking on the moon NASA and the Russian space program make traveling to the stars look easy but it has been far from that Space travel is a sometimes heroic sometimes humorous and always dangerous journey fraught with perils around every corner that most of us have never heard of or have long since forgotten Space Oddities brings these unknown offbeat and obscure stories of space to life From the showmanship and bravado of the earliest known space fatality German Max Valier to the first ever indictment under the Espionage Act on an Army officer who leaked secrets concerning the development of early U S rockets and the story of a single loose bolt that defeated the Soviet Union s attempt to beat America to the moon Author Joe Cuhaj also sheds light on the human aspects of space travel that have remained industry secrets until now how the tradition of using a musical playlist to wake astronauts up began fascinating tales about inventions like the Fischer Space Pen Omega watches and even Tang breakfast drink In addition to fun and entertaining space trivia Space Oddities also features stories of the profound impact that space travel has had on challenges right here at home like the effort by civil rights leaders and activists in the 1960s to bring the money from the space program back home to those in need on Earth NASA s FLATs First Lady Astronaut Training program and the 13 women who were selected to become astronauts in 1960 but were denied a chance at flying even after successfully completing the rigorous astronaut training program and the

animals who many times sacrificed their lives to prove that man could fly in space Filled with rare and little known stories Space Oddities will bring the final frontier to the homes of diehard space readers and armchair astronauts alike Beastly Natures Dorothee Brantz,2010-07-08 Jacket **Space Physiology and Medicine** Arnauld E. Nicogossian,Richard S. Williams,Carolyn L. Huntoon,Charles R. Doarn,James D. Polk,Victor S. Schneider,2016-12-13 As space medicine evolved from the late 1950s onward the need arose for a ready reference for students and practitioners on the basic concepts of this new specialty Through three editions edited by leaders in the development of space medicine this classic text has met the need This fourth edition of Space Physiology and Medicine provides succinct evidence based summaries of the current knowledge base in space medicine and serves as a source of information on the space environment responses and practices Additionally there is extensive online material available for each chapter featuring overviews and self study questions **The Rise of the Dogs** Alexander Varga,2025-06-10 What if humanity vanished and dogs took their place One million years after the extinction of Homo sapiens Earth no longer belongs to humans Nature has reclaimed the cities the remnants of technology crumble but life has taken a new direction Dogs once our companions and wards have embarked on a new path Through evolution they have become intelligent thinking beings and have built their own civilization The Rise of the Dogs is a fascinating speculative journey into a future where the species Canis sapiens rules the planet Discover how they overcame their instinctual origins learned to communicate live in communities write history build cities and reach for the stars This book is not only an alternative evolutionary theory but also a thought provoking mirror what has humanity left behind What can a new intelligent species learn from us or from our mistakes Prepare for a unique future where the descendants of wolves speak build dream and remember us
