SINGH PAWAR KUMAR RAUNIJA (POORNIMA.),2025 The rapid advancements in space exploration have transformed outer space into a domain of unprecedented commercial scientific and strategic significance With the increasing involvement of private enterprises growing concerns over space debris and the pressing need for international cooperation the legal framework governing outer space has never been more critical This book provides an in depth examination of space law and governance tracing its history With Stars in Their Eyes James B. Breckinridge,Alec M. Pridgeon,2022-04-29 The incredible story of the Meinel's has never been told nor have their accomplishments and contributions ever been adequately recounted in one publication This book is an effort to redress that oversight using interviews from those who knew them best their own prodigious body of work including an unpublished autobiography and documentation in Presidential libraries as well as universities and the National Archives *Transatlantic Space Politics* Sheng-Chih Wang,2013-05-29 This book examines transatlantic politics through an analysis of 60 years of US European strategic interaction in space The significance of space politics for the study of transatlantic relations receives surprisingly little scholarly attention As a theatre of interaction transatlantic space politics reflects the vicissitudes of European and US power in the international system An understanding of space politics is therefore vital in understanding the status and prospect of the transatlantic order Using established IR theories the author investigates transatlantic space politics and proposes a theoretical explanation which is distinct from the conventional wisdom of the transatlantic security community More specifically he distinguishes between the constitutive and regulatory effects of the transatlantic security community an approach rarely employed in other research in the field Overall this book suggests not only that the transatlantic institutional pillar requires repair but also that the ideational factors need to be revitalised in order to consolidate the transatlantic alliance This book will be of much interest to students of space power transatlantic politics strategic studies foreign policy and IR security studies in general
