Space Time And Medicine:

Space, Time, and Medicine Larry Dossey, 1982-04-12 What we call modern physics says something entirely new about the world and how it behaves For many years these theories have been accepted as the most accurate descriptions we have ever had about our world Nevertheless medicine has been reluctant to incorporate these ideas into itself continuing to view the body as a clockwork mechanism in which illness is caused by a breakdown of parts Drawing on his long experience in the practice of internal medicine and his knowledge of modern science Dr Dossey shows how medicine can and must be updated Discussing the new theories of Bell Godel and others he opens up startling questions for medicine Could the brain be a hologram in which every part contains the whole Why have ordinary people been able to raise and lower blood pressure at will control heart rate body temperature even one minute blood vessel in a way no one can explain What is the role of consciousness in health and illness Perhaps the most startling of Dr Dossey's discussions concerns nonlinear time There is evidence that our obsession with time and our belief that time flows a belief refuted by the new physics may profoundly affect our health Time sickness is becoming an accepted medical concept a possible cause of the greatest killer of all heart disease Dr Dossey presents remarkable clinical data showing that by changing their view of time people have been able to positively affect the course of disease Just as the clockwork picture of the universe was abandoned in the onslaught of new data our mechanistic view of health and illness will give way to new models which too will be more consistent with the true face of the universe **Space, Time, & Medicine** Larry Dossey, 1982 Space, Time and Medicine Larry Dossey, 1982-04-01

Whitehead's Radically Different Postmodern Philosophy David Ray Griffin,2012-02-01 Postmodern philosophy is often dismissed as unintelligible self contradictory and as a passing fad with no contribution to make to the problems faced by philosophers in our time While this characterization may be true of the type of philosophy labeled postmodern in the 1980s and 1990s David Ray Griffin argues that Alfred North Whitehead had formulated a radically different type of postmodern philosophy to which these criticisms do not apply Griffin shows the power of Whitehead s philosophy in dealing with a range of contemporary issues the mind body relation ecological ethics truth as correspondence the relation of time in physics to the irreversible time of our lives and the reality of moral norms He also defends a distinctive dimension of Whitehead s postmodernism his theism against various criticisms including the charge that it is incompatible with relativity theory **Book Alone** , SpaceTime of the Imperial Holt Meyer,Susanne Rau,Katharina Waldner,2016-11-07 This volume works through spatio temporal concepts to be found in imperial practices and their representations in a wide range of media The individual cases investigated in the volume cover a broad spectrum of historical periods from ancient times up to the present Well known international scholars treat special cases of the topic using cutting edge theory and approaches stemming from historical cartographic religious literary media studies as well as ethnography
