Spaces Of Culture City Nation World:

Spaces of Culture Scott Lash, Mike Featherstone, 1999-03-28 In *Spaces of Culture* an international group of scholars examines the implications of questions such as What is culture What is the relationship between social structure and culture in a globalized and networked world Do critical perspectives still apply or does the speed and complexity of cultural production demand new forms of analysis They explore the key themes in social theory the nation state the city modernity and reflexivity post Fordism and the spatial logic of the informational city The contributors go on to analyze the public sphere questioning the reductive representation of technology as a form of instrumentality and demonstrating how new technologies can offer new spaces of culture This analysis

Cosmopolitan Vision Ulrich Beck, 2006-04-28 In this new book Ulrich Beck develops his now widely used concepts of second modernity risk society and reflexive sociology into a radical new sociological analysis of the cosmopolitan implications of globalization Beck draws extensively on empirical and theoretical analyses of such phenomena as migration war and terror as well as a range of literary and historical works to weave a rich discursive web in which analytical critical and methodological themes intertwine effortlessly Contrasting a cosmopolitan vision or outlook sharpened by awareness of the transformative and transgressive impacts of globalization with the national outlook neurotically fixated on the familiar reference points of a world of nations states borders sovereignty exclusive identities Beck shows how even opponents of globalization and cosmopolitanism are trapped by the logic of reflexive modernization into promoting the very processes they are opposing A persistent theme running through the book is the attempt to recover an authentically European tradition of cosmopolitan openness to otherness and tolerance of difference What Europe needs Beck argues is the courage to unite forms of life which have grown out of language skin colour nationality or religion with awareness that in a radically insecure world all are equal and everyone is different

New Media and Politics Barrie Axford, Richard Huggins, 2000-12-05 The book makes a successful attempt to map the potentially transformative effects of new media on various aspects of political institutions and culture both at a theoretical and empirical level Barrie Axford's discussion of the changing nature of political practice and technologies of political communication in relation to wider discourse of crisis is insightful and well argued This is a genuinely thought provoking and generally very well written book The book also works well by providing a potential basis for theoretically informed future research in the field of political communication Political Theory Exploring the theme of the putative transformation of political modernity under the impact of new media this book adopts a questioning approach to the ways in which cultural and technological factors are affecting the temper of political life and reflects the variety of normative thinking about and empirical research on the changing character of politics in mediatized cultures New Media and Politics examines the extent to which commercial populism now dominates electoral and other political discourses the ways in which the functions of leadership government and political parties are modified by different forms of both old and new media the democratic or

undemocratic import of such changes and the ways in which the dominant territorial paradigm of politics is challenged by the space and time devouring capacities of electronic media Global News Production Lisbeth Clausen,2003 Events around the world are broadcast by giant media players such as CNN BBC and NHK amongst others This book explores how powerful political and economic agendas in the national media environment influence the production processes Urban Nightscapes Paul Chatterton,Robert Hollands,2003 Explores how urban nightlife is experiencing a McDonaldisation where big branded names are taking over large parts of downtown areas leaving consumers with an increasingly standardised experience

City Futures Doctor Edgar Pieterse,2008-11-20 Cities are the future In the past two decades a global urban revolution has taken place mainly in the South The mega cities of the developing world are home to over 10 million people each and even smaller cities are experiencing unprecedented population surges The problems surrounding this influx of people slums poverty unemployment and lack of governance have been well documented This book is a powerful indictment of the current consensus on how to deal with these challenges Pieterse argues that the current shelter for all and urban good governance policies treat only the symptoms not the causes of the problem Instead he claims there is an urgent need to reinvigorate civil society in these cities to encourage radical democracy economic resilience social resistance and environmental sustainability folded into the everyday concerns of marginalised people Providing a dynamic picture of a cosmopolitan urban citizenship this book is an essential guide to one of the new century s greatest challenges **Seoul, Korea's Global City** Kyoung-Ho

Shin,Michael Timberlake,2020-05-27 Seoul as one of Asia s rising global cities has been a place where enormous changes in politics industry and culture have taken place over the last five decades This book explores the new urbanism in Seoul from the perspective of global political economy focusing on the contexts in which the city has witnessed the transformation of its population structure such as the rise of the global urban middle class and the city s increased nodal function in commodity chains The burgeoning signs of Seoul s status as a global city are discussed in terms of transnational tourism and the frequency of study abroad the immigrant community and cross border cultural flows Examining the labour structures within the city economic growth policy the role of advanced information technology and neoliberal urban development the authors also examine the local response in the city to its emerging status A study of the development of the Korean capital and its deep embeddedness in the world economy Seoul Korea s Global City will appeal to scholars of sociology geography and economics with interests in political economy urban studies and Asian studies **Applying Translation Theory to**

Musicological Research Małgorzata Grajter,2024-05-26 This monograph lays the foundation for new methodologies of research between music and translation It is the first such holistic attempt from the perspective of a musicologist based on the adaptation of translation theories Until now these fields have remained underexplored together Only recently have the tools developed by translation theory permeated into musical scholarship Such tools should prove as a promising alternative to those offered by classic musicological studies particularly in reference to musical arrangement pop music covers and

performance Theoretical discussion on topics are supported by case studies This text appeals to musicologists and musicians as well as experts in the field of translation theory who are interested in expanding their field of inquiry

Space, the City and Social Theory Fran Tonkiss, 2005 Taking a thematic approach this book covers the main aspects of modern urban life taught on undergraduate courses The key approaches to the city within contemporary social theory are assessed Tonkiss adopts an international perspective with examples drawn from places such as New York Paris and Sydney

Whose Public Space? Ali Madanipour, 2010-01-21 Public spaces mirror the complexities of urban societies as historic social bonds have weakened and cities have become collections of individuals public open spaces have also changed from being embedded in the social fabric of the city to being a part of more impersonal and fragmented urban environments Can making public spaces help overcome this fragmentation where accessible spaces are created through inclusive processes This book offers some answers to this question through analysing the process of urban design and development in international case studies in which the changing character level of accessibility and the tensions of making public spaces are explored The book uses a coherent theoretical outlook to investigate a series of case studies crossing the cultural divides to examine the similarities and differences of public space in different urban contexts and its critical analysis of the process of development management and use of public space with all its tensions and conflicts While each case study investigates the specificities of a particular city the book outlines some general themes in global urban processes It shows how public spaces are a key theme in urban design and development everywhere how they are appreciated and used by the people of these cities but also being contested by and under pressure from different stakeholders
