Spaces of Homotopy Self-Equivalences - A Survey John W. Rutter, 2006-11-14 This survey covers groups of homotopy self equivalence classes of topological spaces and the homotopy type of spaces of homotopy self equivalences For manifolds the full group of equivalences and the mapping class group are compared as are the corresponding spaces Included are methods of calculation numerous calculations finite generation results Whitehead torsion and other areas Some 330 references are given The book assumes familiarity with cell complexes homology and homotopy Graduate students and established researchers can use it for learning for reference and to determine the current state of knowledge Groups of Homotopy Self-Equivalences and Related Topics

Self-Equivalences and Related Topics Ken-ichi Maruyama, John W. Rutter, 2001 This volume offers the proceedings from the workshop held at the University of Milan Italy on groups of homotopy self equivalences and related topics The book comprises the articles relating current research on the group of homotopy self equivalences homotopy of function spaces rational homotopy theory classification of homotopy types and equivariant homotopy theory Mathematicians from many areas of the globe attended the workshops to discuss their research and to share ideas Included are two specially written articles by J W Rutter reviewing the work done in the area of homotopy self equivalences since 1988 Included also is a bibliography of some 122 articles published since 1988 and a list of problems This book is suitable for both advanced graduate students and researchers **Groups of Self-Equivalences and Related Topics**

Renzo A. Piccinini, 2006-11-14 Since the subject of Groups of Self Equivalences was first discussed in 1958 in a paper of Barcuss and Barratt a good deal of progress has been achieved This is reviewed in this volume first by a long survey article and a presentation of 17 open problems together with a bibliography of the subject and by a further 14 original research articles Noncommutative Geometry

Alain Connes, Joachim Cuntz, Erik G. Guentner, Nigel Higson, Jerome Kaminker, John E. Roberts, 2003-12-08 Noncommutative Geometry is one of the most deep and vital research subjects of present day Mathematics Its development mainly due to Alain Connes is providing an increasing number of applications and deeper insights for instance in Foliations K Theory Index Theory Number Theory but also in Quantum Physics of elementary particles The purpose of the Summer School in Martina Franca was to offer a fresh invitation to the subject and closely related topics the contributions in this volume include the four main lectures cover advanced developments and are delivered by prominent specialists Theory of K-Loops

Hubert Kiechle, 2002-03-25 The book contains the first systematic exposition of the current known theory of K loops as well as some new material In particular big classes of examples are constructed The theory for sharply 2 transitive groups is generalized to the theory of Frobenius groups with many involutions A detailed discussion of the relativistic velocity addition based on the author's construction of K loops from classical groups is also included The first chapters of the book can be used as a text the later chapters are research notes and only partially suitable for the classroom The style is concise but complete proofs are given The prerequisites are a basic knowledge of algebra such as groups fields and vector spaces with forms

Homotopy Theory of Function Spaces and Related Topics Yves Félix, Gregory Lupton, Samuel B. Smith, 2010 This volume contains the proceedings of the Workshop on Homotopy Theory of Function Spaces and Related Topics which was held at the Mathematisches Forschungsinstitut Oberwolfach in Germany from April 5-11, 2009. This volume contains fourteen original research articles covering a broad range of topics that include localization and rational homotopy theory, evaluation subgroups, free loop spaces, Whitehead products, spaces of algebraic maps, gauge groups, loop groups, operads, and string topology. In addition to reporting on various topics in the area, this volume is supposed to facilitate the exchange of ideas within Homotopy Theory of Function Spaces and promote cross fertilization between Homotopy Theory of Function Spaces and other areas. With these latter aims in mind, this volume includes a survey article which, with its extensive bibliography, should help bring researchers and graduate students up to speed on activity in this field, as well as a problems list which is an expanded and edited version of problems discussed in sessions held at the conference. The problems list is intended to suggest directions for future work.

Noncommutative Gröbner Bases and Filtered-Graded Transfer Huishi Li, 2004-10-19 This self-contained monograph is the first to feature the intersection of the structure theory of noncommutative associative algebras and the algorithmic aspect of Gröbner basis theory. A double filtered graded transfer of data in using noncommutative Gröbner bases leads to effective exploitation of the solutions to several structural computational problems, e.g., an algorithmic recognition of quadric solvable polynomial algebras, computation of GK dimension and multiplicity for modules, and elimination of variables in noncommutative setting. All topics included deal with algebras of q -differential operators as well as some other operator algebras, enveloping algebras of Lie algebras, typical quantum algebras, and many of their deformations.

Characters and Cyclotomic Fields in Finite Geometry Bernhard Schmidt, 2004-10-13 This monograph contributes to the existence theory of difference sets, cyclic irreducible codes, and similar objects. The new method of field descent for cyclotomic integers of prescribed absolute value is developed. Applications include the first substantial progress towards the Circulant Hadamard Matrix Conjecture and Ryser's conjecture since decades. It is shown that there is no Barker sequence of length l with $l \equiv 1 \pmod{13}$.

Yetter-Drinfel'd Hopf Algebras over Groups of Prime Order Yorck Sommerhäuser, 2004-10-19 Being the first monograph devoted to this subject, the book addresses the classification problem for semisimple Hopf algebras, a field that has attracted considerable attention in the last years. The special approach to this problem taken here is via semidirect product decompositions into Yetter-Drinfel'd Hopf algebras and group rings of cyclic groups of prime order. One of the main features of the book is a complete treatment of the structure theory for such Yetter-Drinfel'd Hopf algebras.

hp-Finite Element Methods for Singular Perturbations Jens M. Melenk, 2004-10-19 Many partial differential equations arising in practice are parameter dependent problems that are of singularly perturbed type. Prominent examples include plate and shell models for small thickness in solid mechanics, convection-diffusion problems in fluid mechanics, and equations arising in semiconductor device modelling. Common features

of these problems are layers and in the case of non smooth geometries corner singularities Mesh design principles for the efficient approximation of both features by the hp version of the finite element method hp FEM are proposed in this volume For a class of singularly perturbed problems on polygonal domains robust exponential convergence of the hp FEM based on these mesh design principles is established rigorously

Spaces Of Homotopy Selfequivalences A Survey Introduction

In today's digital age, the availability of Spaces Of Homotopy Selfequivalences A Survey books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Spaces Of Homotopy Selfequivalences A Survey books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Spaces Of Homotopy Selfequivalences A Survey books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Spaces Of Homotopy Selfequivalences A Survey versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Spaces Of Homotopy Selfequivalences A Survey books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Spaces Of Homotopy Selfequivalences A Survey books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Spaces Of Homotopy Selfequivalences A Survey books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to

borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Spaces Of Homotopy Selfequivalences A Survey books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Spaces Of Homotopy Selfequivalences A Survey books and manuals for download and embark on your journey of knowledge?
