The Wines of Spain Julian Jeffs, 2006-05-18 The transformation of the Spanish wine industry over the last 20 years has been astonishing From a state of very considerable decay it has reinvented itself with great vigour and style Four decades ago such reputation as the wines of Spain had rested on the declining quality of Sherry and the occasional majestic Rioja towering above the surrounding sea of mediocre oxidised table wines How things have changed exclaims Julian Jeffs in the introduction to his valuable *The Wines of Spain* the latest addition to Faber and Faber's series of wine books Over the course of two years Jeffs put in a great deal of intensive research in Spain travelling the length and breadth of the country visiting growers and tasting their wines The effort has paid off in a wealth of engrossing detail The volume is organised into sections dealing with the main provinces or geographical regions Aragon Catalunya Andalucia and so on then within those by the individual Denominacion de Origen DO Within each DO the leading or most interesting bodegas are profiled allowing Jeffs to build up a cumulative portrait of the regional characters Especially evocative are the portions of the book dealing with the ancient and distinguished Sherry houses in Andalucia many of them of course founded in the 18th or 19th centuries by British or Irish merchants The account of the great Bodegas Vega Sicilia in Castilla is emblematic of the progress of the entire Spanish wine industry Producing some of the world's finest wine up to the 1920s it fell into poor practices and the quality and reliability of the wine suffered badly Under the modernising current owners the wine has regained its former reputation According to Julian Jeffs Vega Sicilia is on a Wagnerian scale with all that master's subtlety and complexity Robin Davidson This text refers to an out of print or unavailable edition of this title

Our War with Spain, 1898 *An Historical Essay on Modern Spain* Richard Herr, 1974-11-20 More political than cultural in its emphasis this enormously detailed scholarly yet thoroughly readable book about modern Spain under Franco should fascinate any reader curious to know what changes have been wrought in that country in the past 30 years Professor Herr UCLA and Berkeley has researched painstakingly and drawn a clear authentic and meaningful portrait of Spain today as it is

rapidly being transformed from an agrarian society to one now predominantly industrial Publishers Weekly Professor Herr is also seeking the origins of modern Spain his history is Aristotelian in that the end dominates the process He seeks these origins in the later eighteenth century when the traditional order was perceived to be a bar to progress A group of civil servants influenced by the European Enlightenment sought to bring Spain into Europe believing that industrial progress education and agrarian reform would do the trick but all their reforms were opposed by Catholic traditionalists Hence the division into the two Spains Yet it is not the old crude version of two Spains so often served up to explain everything from the failure of university reform to the Civil War that Professor Herr plumps for He sees the course of Spanish history explained by the rise and modification of the Moderado oligarchy he does throw out a lifeline in a sea of complexities and gives us the best short account of Franco Spain Spectator This is a work of substantial interest and value which must be recommended as a well balanced readable and scholarly introduction to a subject which has never ceased to be controversial and is still in the process of reinterpretation commands a high place among the general histories of Spain Journal of Modern History
