## **Spain And The Process Of European Integration 1957-85:**

Spain and the Process of European Integration, 1957-85 J. MacLennan, 2000-10-04 This book examines the process of Spanish integration into the European Community from 1962 when Spain under the Franco regime applied to the European Community to 1985 when democratic Spain became a member of the EEC It aims to prove that first the European Community was the crucial external factor determining political change in Spain and secondly that Europeanism was a mechanism of political change as it was the only aim which unified the whole political spectrum from the Francoist establishment to the democratic opposition

**Spain and the Process of European Integration, 1957-85** NA, 2001-02-03 This book examines the process of Spanish integration into the European Community from 1962 when Spain under the Franco regime applied to the European Community to 1985 when democratic Spain became a member of the EEC It aims to prove that first the European Community was the crucial external factor determining political change in Spain and second that Europeanism was a mechanism of political change as it was the only aim which unified the whole political spectrum from the Francoist establishment to the democratic opposition

Feminism, National Identity and European Integration in Modern Spain Kathryn L. Mahaney, 2024-04-18 This book explores the evolution of Spanish feminism in the context of European feminisms and institutions from the 1960s to recent times Beginning with Sección Femenina the official Francoist women's organization Feminism National Identity and European Integration in Modern Spain traces the interplay between Spanish women's policy and international policymaking In some cases as with the Sección Femenina championed Law of Political Rights Ley de Derechos in 1961 Spanish women's policy at least appeared more progressive than what Western democracies offered notable at a time when Spain was considered backward After Franco's death in 1975 Spain's democratic transition seemingly consolidated forward thinking women's policy with a Constitution that guaranteed equality of the sexes in 1978 and with the creation of a national bureau charged with crafting women's policy the Instituto de la Mujer Women's Institute in 1983 Yet feminists found themselves marginalized in Spanish political decision making as Kathryn L. Mahaney argues so successfully in this study Mahaney reveals that women ultimately influenced domestic policy not by acting within national networks but by leveraging European connections particularly after Spain joined the European Economic Community EEC in 1986 The book shows that Spanish feminists worked through the EEC to gain international approval of policies that had met domestic opposition and did so by representing them as necessary litmus tests of nations' democratic integrity Their proposals were shaped by the specific context of Spanish feminism but also by Spanish debates about what rights democracies should grant women and what equality in a post fascist nation should encompass This groundbreaking study explains that in turn these processes shaped both Spain's and the European Union's much prized self identities as democratic communities

Spain, 1833-2002 Mary Vincent, 2007-12-06 This book provides a cultural history of Spanish politics from the civil war of 1833 to the Spanish adoption of the Euro in 2002 a period dominated for the most part

by violent military interventions in the political process a succession of weak unstable but repressive governments and the ever present threat of rebellion from below and culminating in the victory and repressive dictatorship of General Franco Using a wide range of sources both textual and material Mary Vincent focuses on the question of how ordinary people came to identify themselves both as citizens and as Spaniards throughout this turbulent period She argues that a weak state rather than a weak sense of nation was the key to Spain's problematic development and that this is the key to explaining both the persistence of political violence and the strength of regional nationalism in modern Spain But as Vincent shows from the 1970s with modernization of the state and the introduction of democratic politics all Spaniards including Catalans and Basques enthusiastically adopted an additional identity that of Europeans And while questions over the territorial unity of the Spanish state have still not been wholly resolved nevertheless the political choices facing Spaniards today are very similar to those of other western European nations and Spanish singularity appears at last to be consigned to the past

**Spain** Joseph Harrison, David Corkill, 2016-03-09 Perhaps more than any other European country Spain has undergone a remarkable transformation in the post war period To the surprise of many it has succeeded in making the leap from a predominantly agricultural and politically repressed country to a modern European democracy with a diversified economy containing important manufacturing and service sectors Yet despite the fact that at the beginning of the twenty first century Spain is the world's eighth largest economy old stereotypes that see the Iberian nation as an inflexible unchanging society persist As such scholars will welcome this new study which challenges the picaresque and outdated notions of Spanish economic development replacing them with a picture of rapid and profound modernization Building upon the recent work of historians and economists the authors provide a thoughtful and compelling overview of the subject that clearly elucidates both the positive and negative aspects of modern Spanish development Thus as well as charting the undoubted successes achieved persistent problems most notably high unemployment are also explored Written in a straightforward and engaging manner this book engages with research from a wide variety of disciplines and will be of interest to anyone with a specific interest in modern Spain or a wider interest in economic development within the framework of the European Union

reflections and conclusions on the various arguments that are put forward Each chapter considers the entire period from 1957 1992 to identify and explain overarching trends key decisions and historical conjunctions through scholarly literature key debates and original discussion of each topic or policy issue A final chapter situates the main findings within wider contexts situating the EC in Cold War history Bringing together international history and international relations this project allows for cross disciplinary dialogue and the careful discussion of key concepts analytical approaches and empirical findings Filling a gap in our understanding of the early development of the EC's role as an autonomous global actor this book holds important messages for the modern day as the EU's position in global politics continues to shape the world

**A Sociology of Transnational Constitutions** Chris Thornhill, 2019-10-24 This volume focuses on the rise of transnational constitutional laws primarily created by the interaction between national and international courts and by the domestic transformation of international law Through detailed analysis of patterns of institutional formation at key historical junctures in a number of national societies it examines the social processes that have locked national states into an increasingly transnational constitutional order and it explains how the growth of global constitutional norms has provided a stabilizing framework for the functions of state institutions The book adopts a distinctive historical sociological approach to these questions examining the deep continuities between national constitutional law and contemporary models of global law The volume makes an important contribution to the sociology of constitutional law to the sociology of post national legal processes and to the sociology of human rights law This title is also available as Open Access

**Perspectives of National Elites on European Citizenship** Nicolò Conti, Maurizio Cotta, Pedro Tavares de Almeida, 2014-04-10 Over the last two decades the process of European integration has become interwoven with the theme of citizenship and the debate on the democratic quality of the EU and of its

institutions has become more salient What are the views about Europe which emerge when we interrogate the national elites of the four large South European countries Greece Italy Portugal Spain and what is their vision of a supra national citizenship in its different facets Are these views sufficiently homogeneous and do they distinguish themselves from those of the rest of the European Union to the point of enabling us to talk about a distinctive region of Europe Which interpretation s of European citizenship emerges from a systematic exploration of these opinions Using a set of survey and textual data collected in the framework of the IntUne project the authors attempt to provide some original answers to these questions This book was published as a special issue of South European Society and Politics *Violent Politics* M. Addison,2015-12-22 Violent politics in Northern Ireland has lasted thirty years and cost four thousand lives and billions of pounds Many such conflicts afflict the world This book describes the search for causes and solutions It identifies the key factors driving violent politics and the range of counter strategies It analyzes the course of the troubles in Northern Ireland and the results of the countermeasures used The conclusions are disturbing The recommendations are controversial but difficult to escape **The Eastern Front, 1941-45, German Troops and the Barbarisation of Warfare** O. Bartov,2001-07-30 Based largely upon unpublished sources Omer Bartov s study looks closely at the background of the German army on the Eastern Front during the Second World War He describes the physical hardship the discipline and morale at the front and analyses the social educational and political background of the junior officers who formed the backbone of the German army Only with these factors in mind together with the knowledge of the extent of National Socialist indoctrination can we begin to explain the criminal activities of the German army in Russia and the extent of involvement of the army in the execution of Hitler s brutal policies *Lord Hailey, the Colonial Office and Politics of Race and Empire in the Second World War* S. Wolton,2000-06-21 The book studies the Anglo American debate in which British officials led by Lord Hailey countered American criticisms of imperial rule by emphasizing economic development and peace keeping as new non racial justifications for western authority These are themes that have retained a powerful resonance in the post war world *The Grand Alliance and Ukrainian Refugees* M. Dyczok,2000-07-11 This study explores the role of refugees in international relations by looking at the largest involuntary migration of Ukrainians in history Using both Western and newly available Soviet sources it sheds light on Grand Alliance policies towards World War II Ukrainian refugees It demonstrates how the activities of this particular group of refugees had an impact on international refugee policy and provides insight into the origins of the Cold War **Neutrality and Statebuilding in Sweden** M. Malmborg,2001-10-02 The successful maintenance of peace since 1814 made neutrality a widely popular doctrine in Sweden Rather than a security policy in the strict sense it has become a cornerstone of Swedish national identity Yet in the past decade the neutrality tradition has been called into question What is meant by neutrality Has Sweden ever been neutral This book analyses the emergence institutionalisation and reassessment of neutrality of the notion of peace as a national good from the sixteenth century to the present debate on NATO membership **Concepts of**

**Refashioning Iran** M. Tavakoli-Targhi, 2001-10-10 Mohamad Tavakoli Targhi offers a corrective to recent works on Orientalism that focus solely on European scholarly productions without exploring the significance of native scholars and vernacular scholarship to the making of Oriental studies He brings to light a wealth of eighteenth and nineteenth century Indo Persian texts made homeless by subsequent nationalist histories and shows how they relate to Indo Iranian modernity In doing so he argues for a radical rewriting of Iranian history with profound implications for Islamic debates on gender
