

SPATIAL INEQUALITY OCCURS AT MANY SCALES

Across states

In West Virginia, more than 30 percent of prime working age adults were out of the labor force—the highest share nationwide—even when the country was approaching the peak of the last economic expansion. That was more than double the share in North Dakota, the best-performing state.

Across the rural-urban continuum

By 2019, employment and prime-age labor force participation in non-metropolitan counties had still not recovered to levels from before the Great Recession. Meanwhile, employment in urban areas had fully rebounded and grown by an additional 9 percent.

Across counties

From 1970 to 1980, total personal income grew by 169 percent for the country as a whole and even faster for over 60 percent of counties. From 2010 to 2018, personal income grew by only 42 percent nationally and faster in only 17 percent of counties.

Across zip codes

Since 2000, the top one-fifth of zip codes in terms of economic well-being have captured more than three-fifths of total job growth.
